Volume 10884

Proceedings of SPIE, 1605-7422, V. 10884

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Single Molecule Spectroscopy and Superresolution Imaging XII*, edited by Zygmunt K. Gryczynski, Ingo Gregor, Felix Koberling, Proceedings of SPIE Vol. 10884 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	Authors
vii	Conference Committee

NANOSCOPY AND SUPERRESOLUTION MICROSCOPY II

10884 06	3D super-resolution imaging using a generalized and scalable progressive refinement method on sparse recovery (PRIS) [10884-5]
----------	--

FLIM, FRET AND FCS I

10884 0A	Tetherless, precise and extended observation of single-molecule FRET in an Anti-Brownian trap (PicoQuant Young Investigator Award) [10884-9]
10884 0C	Super-resolution multiphoton frequency-domain fluorescence lifetime imaging microscopy by generalized stepwise optical saturation (GSOS) [10884-11]
10884 0D	Analog mean-delay method: a new time-domain super-resolution technique for accurate fluorescence lifetime measurement [10884-12]

NANOSCOPY AND SUPERRESOLUTION MICROSCOPY III

10884 0J	Long-term, super-resolution imaging of amyloid structures using transient amyloid binding microscopy [10884-19]
10884 0I	Three-dimensional localization microscopy by incoherent holography [10884-15]
10884 0K	Oblique lightsheet STORM for tissue samples (PicoQuant Young Investigator Award) [10884-16]

FLIM, FRET AND FCS II

10884 0N	Observing monomer: dimer transitions of neurotensin receptors 1 in single SMALPs by homoFRET and in an ABELtrap [10884-8]
10884 0P	Phasor plot analysis using low pass filter for high-speed FLIM [10884-24]

NANOSCOPY AND SUPERRESOLUTION MICROSCOPY IV

- 10884 0T Quantification of membrane receptor complexes with single-molecule localization microscopy (Invited Paper) [10884-47]
- 10884 0U Superresolution fluorescence microscopy using saturated modulation quenching (SMoQ) [10884-28]

POSTER SESSION

- 10884 11 Fluorescence microscopy instrumentation simplified using novel multi-line lasers [10884-35]
- 10884 12 Fundamental limits of measuring single-molecule rotational mobility [10884-36]
- 10884 15 Single image deconvolution with super-resolution using the SUPPOSE algorithm [10884-39]
- 10884 16 Optimizing and characterizing a home-built Raman spectroscopy optical system using polystyrene microspheres [10884-40]
- 10884 18 Real time multi-modal super-resolution microscopy through Super-Resolution Radial Fluctuations (SRRF-Stream) [10884-42]
