SPIE

Volume 10893

Proceedings of SPIE, 1605-7422, V. 10893

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Reporters, Markers, Dyes, Nanoparticles, and Molecular Probes for Biomedical Applications XI*, edited by Samuel Achilefu, Ramesh Raghavachari, Proceedings of SPIE Vol. 10893 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>

IMAGING AND THERAPIES

10893 04	Acoustofluidic platform for in-channel immunoassays [10893-2]
----------	--

NEAR INFRARED PROBES

10893 07	Noninvasive point-of-care measurement of gastrointestinal permeability [10893-8]
----------	---

IT'S A NANOWORLD: APPLICATIONS USING NANOPARTICLES

10893 0F	Cell-based biosynthesis of linear protein nanoarrays [10893-16]
10893 0G	High-throughput activator sequence selection for silver nanocluster beacons [10893-18]

FLUORESCENT PROBES FOR IMAGING

10893 0K	Imaging mitochondrial matrix viscosity in live cells via fluorescence lifetime imaging (FLIM) of fluorescent molecular rotors [10893-21]
10893 0L	Probing pheomelanin synthesis using thioflavin T fluorescence [10893-22]

POSTER SESSION

10893 0N	Coating carbon nanotube/graphene hybrids with phospholipids [10893-24]
10893 0O	Developing a user community in the photosciences: a website for spectral data and access to PhotochemCAD [10893-26]
10893 0R	Surface-active substance monolayer stability after its formation [10893-28]

10893 OS	A novel fluorescent gold nanoparticle inhibiting migration and invasion of tumor cells [10893-29]
10893 OT	Water purification using the pillared graphene owning the most mechanical strength [10893-30]
10893 OV	Interaction of new hybrid patch with blood vessels and heart layers [10893-32]
10893 OW	Regularities of the formation of a framework from a mixture of single-walled carbon nanotubes in a protein matrix based on albumin and collagen for tissue engineering [10893-33]
10893 OX	Molecular modeling of multilayer cellular and tissue engineering structures based on a wireframe of carbon nanotubes and protein matrix for restoring the tissues of the heart and blood vessels [10893-34]
10893 OY	Theoretical study of the interaction of the electromagnetic field of laser radiation with a mixture of single-walled carbon nanotubes in a protein matrix [10893-35]
10893 OZ	Predicting treatment outcome and enhancing immunotherapy with anti-PDL1 gold nanoparticles [10893-3]
