Volume 10895

Proceedings of SPIE, 1605-7422, V. 10895

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Frontiers in Biological Detection: From Nanosensors to Systems XI*, edited by Amos Danielli, Benjamin L. Miller, Sharon M. Weiss, Proceedings of SPIE Vol. 10895 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

GRATINGS AND INTERFEROMETERS

10895 03	Layer-by-layer nano-assembly of charged polyelectrolytes for label-free optical biosensing with nanostructured materials: the case of nanostructured porous silicon interferometers [10895-2]
10895 04	Rapid diagnostic susceptibility testing of bacteria and fungi from clinical samples using silicon gratings (Invited Paper) [10895-3]

PHOTONIC CRYSTALS

10895 06	Towards an all-fiber system for detection and monitoring of ammonia (Outstanding Student Paper Award) [10895-17]
10895 07	Label-free and fluorescence photonic crystal biochips for early cancer biomarker detection (Invited Paper) [10895-6]

MAGNETICS

10895 08	Portable optical diagnostics for early malaria detection (Invited Paper) [10895-7]
10895 09	Improving the sensitivity of fluorescence-based immunoassays by photobleaching the autofluorescence of magnetic beads [10895-8]

PLASMONICS

10895 0C	Rapid and multiplexed detection of Lyme disease using a grating coupled-fluorescent plasmonics (GC-FP) biosensor platform (Invited Paper) [10895-11]
10895 0G	Nanoplasmonic discrimination of organic solvents using a bimetallic optical tongue (Outstanding Student Paper Award) [10895-15]

ADVANCED SENSING METHODS I

10895 OH **Double emulsion optofluidic microlasers** [10895-16]

LIGHT, SOUND, HEAT

10895 OK **Speckle based sensing of chemicals by an acoustic excitation in aqueous solutions (Invited Paper)** [10895-19]

10895 OL **Monitoring of ammonia in an aqueous environment using a supercontinuum-based photoacoustic sensing system** [10895-20]

10895 OM **High-throughput droplet-based microfluidic optical calorimeter (Invited Paper)** [10895-21]

PHOTONICS I

10895 OO **Packaged microbubble resonators as a robust field sensing device (Outstanding Student Paper Award)** [10895-23]

PHOTONICS II

10895 OT **Long-range surface plasmon waveguide biosensors for disease detection (Invited Paper)** [10895-28]

ADVANCED SENSING METHODS II

10895 OV **A fast and reproducible ELISA laser platform (Outstanding Student Paper Award)** [10895-30]

POSTER SESSION

10895 OY **Direct laser writing of optical biosensor based on photonic Floquet topological insulator for protein detection** [10895-33]

10895 10 **Design and FDTD simulation of photonic crystal based sensor for biosensing applications** [10895-35]

10895 12 **Bio-inspired visual sensing enhances imaging techniques using integrated electro-optical switchable filters** [10895-37]
