SPIE

Volume 10911

Proceedings of SPIE 0277-786X, V. 10911

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Laser Materials Processing: Applications, Diagnostics, and Systems VIII*, edited by Stefan Kaierle, Stefan W. Heinemann, Proceedings of SPIE Vol. 10911 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$18.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>

SURFACE TREATMENT I

10911 03	High power, high energy, and high flexibility: powerful ultrafast lasers based on InnoSlab technology (Invited Paper) [10911-1]
10911 04	Comparison between laser thermal effects and ablation effects with ultrashort pulses laser on GO SiFe electrical steel [10911-2]
10911 05	Ultrashort pulsed high-power laser conditioning of super-abrasive grinding worms [10911-3]
10911 06	Large-area UV processing with a novel 248nm line beam system [10911-4]
10911 07	Analysis of inter-granular corrosion susceptibility stemming from laser-induced thermal cycles [10911-5]

SURFACE TREATMENT II

10911 08	How laser technology can contribute to foster a widespread use of advanced composite materials for light weight applications (Invited Paper) [10911-6]
10911 09	High speed and high power laser material processing: determination of process limits and exploration of new application fields [10911-7]
10911 0A	Thermal distortion in surface pretreatment of metal-polymer hybrids using continuous wave laser radiation [10911-8]
10911 0B	Most compact and versatile 3D marking system [10911-9]

LASER CLADDING

10911 0D	Influence of focal length on the laser metal deposition process with coaxial wire feeding [10911-11]
----------	---

PROCESS MONITORING AND CONTROL

- 10911 0F **New horizons in laser material processing: how OCT sets new standards (Invited Paper, Applications of 3D Printing Best Paper Award)**
[10911-13]
- 10911 0G **Controlling laser processing via optical coherence topography** [10911-14]
- 10911 0I **New sensor and system technology for higher process stability in LMD** [10911-16]
- 10911 0J **Real-time in-focus CO₂ and fiber laser beam optimization with a twin hexapod operated beam expander and fully automated beam analysis with simultaneous raw and focused beam measurement** [10911-17]

CUTTING AND DRILLING

- 10911 0M **CO₂ and CO laser comparison of glass and ceramic processing (Invited Paper)** [10911-20]
- 10911 0N **Advanced macro drilling of carbon fibre reinforced plastics for aerospace applications**
[10911-21]
- 10911 0P **High average power Q-switched CO₂ laser** [10911-23]

BEAM MANIPULATION, TRANSPORT, MEASUREMENT AND SIMULATION

- 10911 0Q **Dynamic high power laser beam shaping device** [10911-24]
- 10911 0R **Proposal of an optical fiber scanner for high-speed and compact laser marking systems**
[10911-25]

JOINING AND WELDING

- 10911 0T **Laser heat conduction welding of CFRP with modified matrix material** [10911-27]
- 10911 0U **High-performance welding of copper with green multi-kW continuous-wave disk lasers**
[10911-28]
- 10911 0V **Low-spatter high speed welding by use of local shielding gas flows** [10911-29]
- 10911 0W **Prevention of solidification cracking by use of a diode laser superposition in pulsed laser beam welding** [10911-30]
- 10911 0X **Beam shaping BrightLine Weld: latest application results** [10911-31]

POSTER SESSION

10911 10 **Experimental analysis on pure copper weld with high intensity blue diode laser by in-situ high speed x-ray imaging [10911-35]**
