

PROCEEDINGS OF SPIE

Organic Photonic Materials and Devices XXI

**Christopher E. Tabor
François Kajzar
Toshikuni Kaino**
Editors

**5–7 February 2019
San Francisco, California, United States**

Sponsored and Published by
SPIE

Volume 10915

Proceedings of SPIE 0277-786X, V. 10915

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Organic Photonic Materials and Devices XXI*, edited by Christopher E. Tabor, François Kajzar, Toshikuni Kaino, Proceedings of SPIE Vol. 10915 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$18.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

3D PRINTING

10915 02	Fabrication of functional nanophotonic devices by multiphoton lithography (Invited Paper) [10915-1]
10915 03	3D photo-responsive optical devices manufactured by advanced printing technologies (Invited Paper) [10915-2]
10915 05	Additive manufacturing of photoluminescent optics [10915-4]

OLEDs

10915 08	Iridium complexes containing nitro-derivatized isoquinoline ligands for photonic applications [10915-7]
----------	---

ORGANIC SENSORS

10915 0I	Comparison of different polymers and printing technologies for realizing flexible optical waveguide Bragg grating strain sensor foils [10915-17]
----------	---

NONLINEAR OPTICS

10915 0N	Understanding photophysics of a high concentration platinum (II) chromophore in epoxy (Invited Paper) [10915-22]
----------	---

PHOTONIC MATERIALS

10915 0R	Practical high refractive index resin usable for near-IR and visible wavelengths (Invited Paper) [10915-26]
----------	---

ORGANIC SEMICONDUCTORS

10915 0Y **Space-charge-limited transport in spatially disordered organic materials: a fractional-dimensional approach** [10915-33]

NANOPHOTONICS I

10915 11 **Wavelength-selective negative photoresist for photolithography suitable for generating microstructures with up to three distinct height levels** [10915-36]

10915 12 **Plasmonic enhancement of absorption in bulk-heterojunction organic solar cells** [10915-37]

NANOPHOTONICS II

10915 13 **Growth of organic nonlinear nanowires through a one-drop self-assembly method (Invited Paper)** [10915-38]

10915 14 **Enhanced light out-coupling in organic light-emitting diodes (OLED) by patterning the cathode in graded photonic super-crystals** [10915-39]

POSTER SESSION

10915 17 **Light-inducing birefringence of organic photoanisotropic materials integrated via covalent bonds** [10915-42]

10915 18 **PDMS-based microstructured biosensor** [10915-44]

10915 1E **Polymerizable ionic liquids for microstructures fabrication** [10915-51]
