

PROCEEDINGS OF SPIE

High Contrast Metastructures VIII

Connie J. Chang-Hasnain
Andrei Faraon
Weimin Zhou
Editors

4–7 February 2019
San Francisco, California, United States

Sponsored and Published by
SPIE

Volume 10928

Proceedings of SPIE 0277-786X, V. 10928

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High Contrast Metastructures VIII*, edited by Connie J. Chang-Hasnain, Andrei Faraon, Weimin Zhou, Proceedings of SPIE Vol. 10928 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

METASURFACES FOR IMAGING AND POLARIMETRY I

10928 OE **Focal length adjustable metalenses for zoom imaging** [10928-12]

METASURFACES FOR IMAGING AND POLARIMETRY II

10928 OI **Continuous achromatic flat subwavelength grating lens over whole visible bandwidths**
[10928-16]

METASURFACES FOR IMAGING AND POLARIMETRY III

10928 OJ **Metasurface computational imaging (Invited Paper)** [10928-17]

FABRICATION OF METASTRUCTURES

10928 OT **Large-area fabrication of metasurface on microspheres based on colloidal assembly and femtosecond ablation** [10928-27]

METASTRUCTURE WAVEGUIDES AND OTHER APPLICATIONS

10928 11 **Manipulating twisted light beam through all-dielectric metasurfaces** [10928-37]

METASURFACES WITH GAIN MEDIA AND VCSELS

10928 18 **Silicon-nitride-based medium-contrast gratings for resonant fluorescence enhancement in the visible wavelength range** [10928-44]

10928 19 **Monolithic high-contrast gratings as highly reflective mirrors: optimization and fabrication**
[10928-45]

EFFICIENT METASTRUCTURE DESIGNS

10928 1F **Long focal-length planar focusing reflectors based on high-contrast gratings** [10928-51]

TOPOLOGICAL METASTRUCTURES

10928 1J **High efficiency anisotropic dual-band metasurface in the infrared region** [10928-55]

OPTIMIZATION AND MACHINE LEARNING FOR METASURFACES

10928 1M **Ultrathin metasurface for the visible light based on dielectric nanoresonators** [10928-58]

10928 1O **Large scale three-dimensional inverse design of discrete scatterer optics** [10928-60]

POSTER SESSION

10928 1S **Optical magnetic field sensor based on guided-mode resonance with Ni subwavelength grating/waveguide structure** [10928-64]

10928 1T **Tunable dielectric metasurface upon using nematic liquid crystals for color filter application** [10928-65]

10928 1V **Split-arc-based metasurface for refractive index sensing applications** [10928-67]
