Volume 10947

Proceedings of SPIE 0277-786X, V. 10947

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Next-Generation Optical Communication: Components, Sub-Systems, and Systems VIII*, edited by Guifang Li, Xiang Zhou, Proceedings of SPIE Vol. 10947 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

NOVEL SDM COMPONENTS AND TECHNIQUES

10947 02	Time-dependence of the transmission matrix of a specialty few-mode fiber [10947-2]
10947 03	Multicore fiber transmission system for high-capacity optical transport network (Invited Paper) [10947-3]
10947 04	Photonic quasicrystal fiber supporting orbital angular momentum modes [10947-4]
10947 07	Turbulence-resistant free-space communication using few-mode pre-amplifiers [10947-7]

ADVANCED MODULATION FORMAT AND PULSE SHAPING

10947 08	Constellation shaping for high symbol rate SNR limited transceivers (Invited Paper) [10947-8]
10947 0A	Multi-dimensional modulation and demodulation techniques for high-capacity optical transport network (Invited Paper) [10947-10]
10947 0B	Numerical investigation on spatial coherent matched detection for detection of spatially multiplexed signals [10947-11]

MACHINE LEARNING APPLICATION AND OPTICS STORAGE

10947 0C	Deep-learning neural network for MIMO detection in a mode-division multiplexed optical transmission system [10947-12]
10947 0D	Design and optimization of quantum well electro-absorptive modulators using machine learning [10947-14]
10947 0E	Lytelooop data "storage in motion" using high-bandwidth laser communications [10947-15]

VISIBLE AND MILLIMETER-WAVE COMMUNICATION

- 10947 OF **Connected cars: road-to-vehicle communication through visible light** [10947-16]
- 10947 OG **Coding schemes in a communication system based on visible-light communication** [10947-18]
- 10947 OH **High-capacity IF-over-fiber transmission technology for next-generation mobile front-haul links (Invited Paper)** [10947-19]

FREQUENCY COMB AND HIGH-SPEED COMPONENTS

- 10947 OI **Optical convolution with a rectangular frequency comb for almost ideal sampling** [10947-21]
- 10947 OJ **12.032 Tbit/s coherent transmission using an ultra-narrow linewidth quantum dot 34.46-GHz C-Band coherent comb laser** [10947-23]
- 10947 OK **Optical Nyquist pulse train generation by non-auxiliary wavelength selective switch in communication band** [10947-24]
- 10947 OL **Recent advances in ultra-high-bandwidth coherent driver modulator (Invited Paper)** [10947-25]
- 10947 ON **Experimental demonstration of three-fold wavelength multicasting of a 64-QAM 120-Gbit/s data channel using a Kerr frequency comb and nonlinear wave mixing** [10947-22]
