Volume 11040

Proceedings of SPIE 0277-786X, V. 11040

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Design Challenge 2019*, edited by Bernard C. Kress, Christophe Peroz, Proceedings of SPIE Vol. 11040 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$21.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

| | |
|-----|----------------------|
| v | Authors |
| vii | Conference Committee |

OPTICAL DESIGN CHALLENGE

| | |
|----------|---|
| 11040 02 | Metasurface-based compact light engine for AR headsets [11040-1] |
| 11040 03 | Co-axial depth map sensor with an extended depth range [11040-2] |
| 11040 04 | Design of Si ₃ N ₄ waveguides and components to form an integrated optical network for retinal projection in thin augmented reality glasses [11040-3] |
| 11040 05 | A retinal-projection-based near-eye display with contact lens for mixed reality [11040-4] |
| 11040 06 | Design and implementation of the Zeretrope: a novel dynamic holographic display [11040-5] |
| 11040 08 | Digitally switchable multi-focal element for wearable displays [11040-7] |
| 11040 09 | Virtual reality headset using a gaze-synchronized display system (Optical Design Challenge 2019 3rd Place) [11040-8] |
| 11040 0B | Scanning depth sensor for see-through AR glasses [11040-10] |
| 11040 0C | Novel design of a quasi-super multi-view head-mounted display [11040-11] |
| 11040 0D | 15 focal planes head-mounted display using LED array backlight (Optical Design Challenge 2019 2nd Place) [11040-12] |
| 11040 0E | Near-eye light field display with polarization multiplexing (Optical Design Challenge 2019 1st Place) [11040-13] |
