Volume 11065

Proceedings of SPIE, 1605-7422, V. 11065

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Saratov Fall Meeting 2018: Optical and Nano-Technologies for Biology and Medicine*, edited by Elina A. Genina, Valery V. Tuchin, Proceedings of SPIE Vol. 11065 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

ix	<i>Authors</i>
xiii	<i>Conference Committee</i>
xvii	<i>Introduction</i>
xix	<i>Organizers</i>

INVITED PAPERS

11065 02	OCT lymphangiography based on speckle statistics evaluation (Invited Paper) [11065-61]
11065 03	OCT-based three-dimensional strain mapping for elastography and relaxography (Invited Paper) [11065-62]
11065 04	5-ALA/PpIX fluorescent diagnostics of stressed-induced small and large intestine neoplasia in laboratorial rats in vivo (Invited Paper) [11065-91]
11065 05	Research and development of effective optical technologies for diagnostics in dermatology (Invited Paper) [11065-102]

BEST STUDENT POSTER AWARD WINNERS

11065 06	Optical coherence elastography as a new method for estimation of chemotherapy efficacy on triple-negative breast cancer in the experiment (Best Student Poster Award) [11065-15]
11065 07	Effect of different macromolecules on viscous and microrheologic properties of blood at various temperatures (Best Student Poster Award) [11065-87]
11065 08	Optical diagnostics of bile duct tissues state with tumor compression (Best Student Poster Award) [11065-33]
11065 09	Effect of ethanol on the transport of methylene blue through the rat skin ex vivo (Best Student Poster Award) [11065-92]

OPTICAL TECHNOLOGIES IN DIAGNOSTICS

11065 0A	Multispectral and autofluorescence RGB imaging for skin cancer diagnostics [11065-1]
----------	---

- 11065 OB **Photodynamic diagnostics for stomach cancer detection in stress modeled lesions in vivo** [11065-3]
- 11065 OC **Phase delay measurements based on acousto-optic filtration of interference image in near-common-path interferometer** [11065-8]
- 11065 OD **Comparison of elastic properties of tissue samples in various pathological states using optical coherence elastography** [11065-14]
- 11065 OE **Blood coagulation estimation using the method of laser-speckle correlation** [11065-2]
- 11065 OF **Amplification of output signal of laser scanning speckle-microscope using gold nanoparticles for detection of Chlamydia trachomatis bacteria. Part 2: experiments** [11065-27]
- 11065 OG **Study of statistical properties of GB-speckles, generated on nucleotide sequences of omp1 gene of Chlamydia trachomatis, simulated using different algorithms of re-coding. Part I. Statistics of intensity fluctuations** [11065-28]
- 11065 OH **Study of statistical properties of GB-speckles, generated on nucleotide sequences of omp1 gene of Chlamydia trachomatis, simulated using different algorithms of re-coding. Part II. Statistics of phase fluctuations** [11065-29]
- 11065 OI **Application of s-LASCA technique for processing of GB-speckles, coding sequences of nucleotide sequences of omp1 gene of Chlamydia trachomatis** [11065-30]
- 11065 OJ **Investigation of statistical characteristics of GB-speckles, coding nucleotide sequences of the gene GPCR of Lumpy Skin Disease virus** [11065-31]
- 11065 OK **Investigation of structural and statistical characteristics of interfering GB-speckles, coding the nucleotide sequences of the gene GPCR of Lumpy Skin Disease Virus** [11065-38]
- 11065 OL **In-vivo pulse wave diagnostics of chicken embryo using high-frequency modulation of intensity of illuminating laser light** [11065-39]
- 11065 OM **Detection of viability of chicken embryo by method of laser Doppler diagnostics** [11065-40]
- 11065 ON **Detection of blood microcirculation of chicken embryo using LASCA-imaging with application of the new techniques of optical clearing** [11065-41]
- 11065 OO **Amplification of output signal of laser scanning speckle-microscope using gold nanoparticles for detection of Chlamydia trachomatis bacteria. Part 1: theoretical study** [11065-42]
- 11065 OP **Study of statistical properties of GB-speckles coding the nucleotide sequences of the target genes of Avian Influenza Virus** [11065-47]
- 11065 OQ **Laser speckle contrast imaging of abdominal organs in mouse model** [11065-51]
- 11065 OR **Fluorescence spectroscopy approach for blood influence compensation** [11065-35]
- 11065 OS **Pilot studies of age-related changes in blood perfusion in two different types of skin** [11065-37]

- 11065 OT **Investigation of blood microcirculation parameters in patients with rheumatic diseases by videocapillaroscopy and laser Doppler flowmetry during cold pressor test [11065-52]**
- 11065 OU **Comparative in-vivo and in-vitro study of blood rheological properties in patients with coronary heart disease with laser-optic techniques [11065-90]**
- 11065 OV **Dielectrophoresis erythrocytes images for predicting stroke recurrence based on analysis of hemorheological parameters [11065-96]**
- 11065 OW **An algorithm for speckle noise reduction in endoscopic optical coherence tomography structural imaging [11065-53]**
- 11065 OX **Young's modulus evaluation for blood vessel equivalent phantoms using optical coherence elastography [11065-54]**
- 11065 OY **Borderline reconstruction of absorbing and scattering inhomogeneity in biological tissue using time-resolved diffuse optical tomography [11065-55]**
- 11065 OZ **Neuroimaging technique using time-resolved diffuse optical tomography and inhomogeneity localization algorithm [11065-56]**
- 11065 10 **Crystallography of oral fluid as an element of personalized evaluation of the human organism's functional state [11065-57]**
- 11065 11 **New approach to detect skin pathologies with polarimetric detection and processing [11065-78]**

THERAPY AND SURGERY LASER APPLICATIONS

- 11065 12 **In vitro Yb,Er:Glass laser hydroacoustic processing of human cataract eye lens: influence of pulse structure on removal efficiency [11065-4]**
- 11065 13 **Optical and morphological investigation of oral cavity mucosa regeneration after the fractional treatment by radiation of 980 nm diode laser [11065-67]**
- 11065 14 **Optical and thermal modeling of Ti-doped optothermal fiber converter for laser surgery [11065-105]**
- 11065 15 **The peculiarities of localized laser heating of a tissue doped by gold nanostars [11065-104]**
- 11065 16 **Modeling of hyperthermia induced by functionalized gold nanorods bound to Staphylococcus aureus under NIR laser radiation [11065-107]**
- 11065 17 **Photodynamic therapy of onychomycosis by high-intensive LED light of wavelength 660 ± 10 nm [11065-16]**
- 11065 18 **Photodynamic aspects of antimicrobial action of silvernanoparticles on Staphylococcus aureus strains [11065-301]**
- 11065 19 **Clinical studies of the combined action of ultraviolet and laser (662 nm) radiation with methylene blue for local therapy of defects of oral mucosa in chronic recurrent aphthous**

stomatitis [11065-108]

MICRO- AND NANOBIO TECHNOLOGY

- 11065 1A **SERS detection of some drugs using aluminum hydroxide with embedded copper nanoparticles** [11065-6]
- 11065 1B **Investigation of polyelectrolyte microcapsule aggregation in human blood** [11065-85]
- 11065 1C **Influence of saline background on microstructured optical fibers optical properties** [11065-73]
- 11065 1D **The pH of protein solutions effect on microstructured optical fibers transmission spectrum** [11065-80]
- 11065 1E **High-temperature terahertz intrawaveguide spectroscopy using hollow-core sapphire photonic crystal waveguide** [11065-99]
- 11065 1F **Electrospark alloying of zirconium and subsequent induction heat treatment** [11065-46]
- 11065 1G **Analysis of (Ti, Zr, Ta)-(O, C, N) systems for obtaining metal-ceramic coatings of the required composition by induction heat treatment** [11065-89]
- 11065 1H **The absorption of oxygen and hydrogen by titanium during heat treatment with high frequency currents** [11065-93]
- 11065 1I **Optical and scanning electron microscopy of the metal-oxide inserts** [11065-94]
- 11065 1J **Ultrafast all-optical THz modulation based on wavelength scaled dielectric particle with graphene monolayer** [11065-95]
- 11065 1K **On the localization of thermal sources existing in a field emission planar nanostructure with a DLC film on a metal edge** [11065-98]
- 11065 1L **Thermal optics of ordered arrays of plasmon nanoparticles in context of SERS, cell optoporation, and pathogen destruction** [11065-106]

MOLECULAR DETECTION AND STUDY

- 11065 1M **Improvement of creatinine SERS detection using molecularly imprinted silica gel** [11065-7]
- 11065 1N **Factors affecting photoluminescence of structures based on citric acid and ethylenediamine** [11065-9]
- 11065 1O **Spectroscopic analysis supported by chemometric tools for quality control of plant- and animal-based matrices** [11065-11]

- 11065 1P **The interaction of the europium complex with human serum albumin** [11065-59]
- 11065 1Q **Changes in the spectral characteristics of preparations containing ascorbic acid with the addition of stabilizers** [11065-60]
- 11065 1R **Induction of chlorophyll fluorescence in Tradescantia leaves acclimated to growth light of different intensities** [11065-72]
- 11065 1S **Study of dielectric parameters of protein solution** [11065-75]
- 11065 1T **Optical properties of biomolecular complexes** [11065-76]
- 11065 1U **New techniques for measuring zeta-potential of colloidal system** [11065-79]
- 11065 1V **Investigation of Ce6 accumulation and distribution in cell cultures of head and neck cancers** [11065-83]
- 11065 1W **Functional and morphological changes in the mother-placenta-fetus system during chronic hypoxia (experimental study)** [11065-86]
- 11065 1X **Red blood cells interaction mediated by dextran macromolecules: in vitro study using diffuse light scattering technique and optical tweezers** [11065-88]
- 11065 1Y **Diffusion of methylene blue in human dentin in the presence of glucose: in vitro study** [11065-101]
- 11065 1Z **A comparison of terahertz optical constants and diffusion coefficients of tissue immersion optical clearing agents** [11065-97]
