

PROCEEDINGS OF SPIE

Tenth International Conference on Graphics and Image Processing (ICGIP 2018)

Chunming Li
Hui Yu
Zhigeng Pan
Yifei Pu
Editors

12–14 December 2018
Chengdu, China

Organized by
College of Computer Science, Sichuan University (China)
School of Information and Communication Engineering, University of Electronic Science and
Technology of China (China)

Sponsored by
Ocean University of China (China)
University of Portsmouth (United Kingdom)
China Society of Image and Graphics (China)
China Graphics Society (China)

Published by
SPIE

Volume 11069
Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 11069

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Tenth International Conference on Graphics and Image Processing (ICGIP 2018)*, edited by Chunming Li, Hui Yu, Zhigeng Pan, Yifei Pu, Proceedings of SPIE Vol. 11069 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xiii	<i>Authors</i>
xix	<i>Conference Committees</i>
xxiii	<i>Introduction</i>

Part One

COMPUTER AND INFORMATION TECHNOLOGY

11069 02	Fluid sequence editing based on ARAP deformation model [11069-14]
11069 03	Semi-implicit incompressible SPH fluid simulation in a marine simulator [11069-153]
11069 04	A deep learning model compression algorithm based on optimal clustering [11069-171]
11069 05	Vorticity constraints in multiphase flow mixture models [11069-48]
11069 06	IDCDP: a novel data preprocessing method [11069-65]
11069 07	REK-SVM: a robust and efficient SVM algorithm based on K-medians clustering [11069-85]

COMPUTER VISION AND VISUALIZATION

11069 08	High-performance image retrieval based on bitrate allocation [11069-116]
11069 09	Region-based parallax-tolerant image stitching [11069-100]
11069 0A	Visual odometry based on convolutional neural networks for large-scale scenes [11069-101]
11069 0B	Background reconstruction via low rank tensor factorization [11069-156]
11069 0C	A novel mask projection 3D printing scheme with visual surveillance [11069-172]
11069 0D	Robot teaching playback based on machine vision and human hand demonstration [11069-35]
11069 0E	Stitching video streams captured by multi-UAVs with stabilization [11069-80]

11069 OF **Panoramic video stitching based on multi-band image blending** [11069-82]

FACE DETECTION AND RECOGNITION

11069 OG **CaCNN: context-aware cascaded CNN for face detection** [11069-104]

11069 OH **Full batch loss for person re-identification** [11069-118]

11069 OI **Good practices on building effective CNN baseline model for person re-identification** [11069-145]

11069 OJ **Using KCF and face recognition for outdoor target tracking UAV** [11069-155]

11069 OK **Fusing the original and its mirror image to perform collaborative representation for face recognition** [11069-3]

11069 OL **Deep face recognition with weighted center loss** [11069-4]

11069 OM **Sparse discriminative multi manifold embedding based on graph optimization** [11069-42]

11069 ON **Person re-identification for 365-day video surveillance based on stride convolutional neural network** [11069-138]

11069 OO **Temporal attention quality aware network for video-based person re-identification** [11069-94]

FEATURE FUSION AND FEATURE MATCHING

11069 OP **Enhanced deep feature representation for patent image classification** [11069-129]

11069 OQ **Shrimps classification based on multi-layer feature fusion** [11069-16]

11069 OR **Convolutional residual learning with sparse robust samples and multi-feature fusion for object tracking** [11069-164]

11069 OS **An improved ORB feature point image matching method based on PSO** [11069-31]

11069 OT **Local stereo matching algorithm for low-texture areas** [11069-45]

11069 OU **Lesion location algorithm of epilepsy signals based on image features** [11069-57]

11069 OV **Robust feature matching for slant SAR image registration based on differentially constrained RANSAC** [11069-70]

11069 0X **MSF-ACNN: multi-scale feature fusion atrous convolutional neural networks for pedestrian fine-grained attribution detection** [11069-89]

IMAGE 3D RECONSTRUCTION

11069 0Y **Passive 3D reconstruction based on binocular vision** [11069-124]

11069 0Z **Efficient 3D correspondence grouping by two-stage filtering** [11069-13]

11069 10 **Triangular patch based texture fusion for multi-view 3D face model** [11069-15]

11069 11 **An automatic algorithm for repairing dental models based on contours** [11069-158]

11069 12 **Outdoor scene 3D reconstruction from multiple point cloud** [11069-166]

11069 13 **A more repeatable and robust local reference frame for 3D local surface description** [11069-30]

11069 14 **Alpha-shape based 3D printable manifold modeling** [11069-62]

11069 15 **An efficient algorithm for defect reconstruction from 3D point cloud** [11069-78]

11069 16 **Image reconstruction in CT from limited-angle projections** [11069-81]

IMAGE ANALYSIS

11069 17 **SMT stencil automatic registration method based on coordinates distribution analysis** [11069-109]

11069 18 **Monocular image depth estimation using dilated convolution and spatial pyramid pooling structure** [11069-126]

11069 19 **A new variational approach to deblurring low-resolution images** [11069-134]

11069 1A **Reversible data hiding for block truncation coding compressed color images** [11069-136]

11069 1B **Principal component analysis applied to interpretation of aerial images** [11069-175]

11069 1C **Multi-frame image restoration based on a new degradation model of hazy and blurred image** [11069-47]

11069 1D **Convolutional neural network with uncertainty estimates for no-reference image quality assessment** [11069-6]

11069 1E **When visual object-context features meet generic and specific semantic priors in image captioning** [11069-73]

IMAGE CLASSIFICATION

11069 1F **Hyperspectral image classification based on local binary patterns and SVDNet** [11069-139]

11069 1G **A meta-learning approach towards microvessel classification based on PAC-Bayes** [11069-132]

11069 1H **A meta-learning method for histopathology image classification based on LSTM-model** [11069-146]

11069 1I **Classification of real estate images using transfer learning** [11069-165]

11069 1J **Deep learning-based accurate diagnosis of eyelid malignant melanoma from gigapixel pathologic slides** [11069-32]

11069 1K **Coin classification in a complex environment** [11069-37]

11069 1L **Correlation-filter enhanced meta-learning for classification of biomedical images** [11069-96]

11069 1M **Combining partial parameter transfer strategy and spatial pyramid pooling for biological-cell classification** [11069-173]

IMAGE PROCESSING TECHNOLOGY AND APPLICATION

11069 1N **Durio Zibethinus ripeness determination and variety identification using principal component analysis and support vector machine** [11069-106]

11069 1O **Nonlocal filtering based salient region detection** [11069-11]

11069 1P **Forgery image detection via mask filter banks based CNN** [11069-123]

11069 1Q **A few-shot learning framework for air vehicle detection by similarity embedding** [11069-148]

11069 1R **Co-saliency detection via cluster-based structured matrix decomposition** [11069-157]

11069 1S **Multiple deep CNN for image annotation** [11069-167]

11069 1T **CRRCNN: cascade rotational RCNN for dense arbitrary-oriented object detection** [11069-19]

11069 1U **Surface defect inspection and classification for glass screen of mobile phone** [11069-43]

- 11069 1V **Dense dilation network for saliency detection** [11069-51]
- 11069 1W **3D point set registration of Chinese calligraphy** [11069-55]
- 11069 1X **Fusion of underwater object classification methods in sonar images** [11069-95]

IMAGE RETRIEVAL AND IMAGE SECURITY

- 11069 1Y **Digital image encryption using chaotic DNA encoding in frequency-domain** [11069-112]
- 11069 1Z **Eye-tracking based relevance feedback for iterative face image retrieval** [11069-120]
- 11069 20 **A clean novel watermarking technique using chaotic logistic map and multiple embedding** [11069-125]
- 11069 21 **End-to-end online handwriting signature verification** [11069-169]
- 11069 22 **A lightweight-client and privacy preserving content-based image retrieval in cloud environment** [11069-20]
- 11069 23 **Texture image retrieval based on directional filter selection and statistical modeling** [11069-27]
- 11069 24 **A two-tiered retrieval method of CAD model based on spectral theory and face code** [11069-59]
- 11069 25 **Data augmentation via photo-to-sketch translation for sketch-based image retrieval** [11069-69]

Part Two

- 11069 26 **A blind watermarking algorithm based on SIFT and Its application in mobile police system** [11069-83]
- 11069 27 **Generative adversarial network based image privacy protection algorithm** [11069-99]

IMAGE SEGMENTATION

- 11069 28 **Coordinate-guided U-Net for automated breast segmentation on MRI images** [11069-84]
- 11069 29 **Multi-object sketch segmentation using convolutional object detectors** [11069-110]
- 11069 2A **A new stereo based on effective cost aggregation** [11069-117]

- 11069 2B **Dense-U-Net: densely connected convolutional network for semantic segmentation with a small number of samples** [11069-159]
- 11069 2C **A novel region growing approach using similarity set score and homogeneity based on neutrosophic set for ultrasound image segmentation** [11069-2]
- 11069 2D **Pointing precision real-time measurement of attitude stabilization platform based on image processing** [11069-54]
- 11069 2E **Improving the convergence of local binary fitting energy for image segmentation** [11069-74]
- 11069 2F **Object detection and segmentation using DenseNets and SIFT Keypoint Match** [11069-87]
- 11069 2G **Space plant image segmentation based on generative adversarial network** [11069-91]
- 11069 2H **Host lane detection method using semantic segmentation combined with hierarchy clustering algorithm** [11069-33]

IMAGE TRANSFORMATION AND ALGORITHM

- 11069 2I **Research on image denoising algorithm based on improved anisotropic diffusion synthetic aperture radar** [11069-36]
- 11069 2J **Aerial image stitching based on group control** [11069-102]
- 11069 2K **Alternating proximal algorithm for L_1/TV^p ($0 < p < 1$) image recovery** [11069-149]
- 11069 2L **Adaptive underwater image recovery using polarimetric imaging** [11069-150]
- 11069 2M **Image smoothing which is invariant under general coordinate transformation** [11069-152]
- 11069 2N **An improved image enhancement method based on lab color space retinex algorithm** [11069-170]
- 11069 2O **Medical image region of interest encryption combined with discrete wavelet transform and hyperchaotic system** [11069-174]
- 11069 2P **Color image denoising based on low-rank tensor train** [11069-41]
- 11069 2Q **A color calibration method for images with infrared crosstalk based on BP neural network** [11069-92]

MEDICAL IMAGE PROCESSING TECHNOLOGY AND METHOD

- 11069 2R **Eye state analysis algorithm based on a weighted color difference matrix** [11069-17]

- 11069 2S **Multi-class breast tumor region detection for gigapixel pathology images using deep neural network with rescale approach** [11069-29]
- 11069 2T **A self-similarity based method for medical image resolution enhancement** [11069-49]
- 11069 2U **A new approach for vaginal microbial micrograph classification using convolutional neural network combined with decision-making tree (CNN-DMT)** [11069-60]
- 11069 2V **Glaucoma detection using statistical features: comparative study in RGB, HSV and CIEL*a*b* color models** [11069-64]
- 11069 2W **An efficient deep neural network for classification in esophageal cancer histopathological images (CNN+LSTM)** [11069-76]
- 11069 2X **Study on osteotomy guide plate generation system** [11069-93]
- 11069 2Y **Detection of fundus hard exudate based on IHBMO-RF** [11069-180]

OPTICAL IMAGING AND COMPUTER PHOTOGRAPHY

- 11069 2Z **Development of a calibration device for the optical scanner** [11069-144]
- 11069 30 **Character input system based on gaze input using wearable camera** [11069-161]
- 11069 31 **Depth estimation via light field camera with a hybrid stereo matching method** [11069-163]
- 11069 32 **A fast hough transform to real-timely extract axes of the axes symmetry target in high-speed image processing system** [11069-40]
- 11069 33 **Overlapping shadows inpainting based on multispectral lighting reproduction** [11069-46]
- 11069 34 **Local pattern-based illumination compensation in face images** [11069-52]
- 11069 35 **A novel blind deconvolution method for adaptive optics images based on wavelength diversity** [11069-68]
- 11069 36 **Camera calibration method based on an isosceles right triangle planar pattern** [11069-77]
- 11069 37 **Guided total variation approach based non-uniformity correction for infrared focal plane array** [11069-98]
- 11069 38 **360*180 stereoscopic panoramas from static light field capturing** [11069-160]
- 11069 39 **An automatic laser sheet calibration method for laser scan range measurement system** [11069-179]

PATTERN RECOGNITION

- 11069 3A **Mushroom identification method based on BP neural network** [11069-128]
- 11069 3B **Handwritten digit recognition based on improved VGG16 network** [11069-103]
- 11069 3C **Human action recognition based on two-stream Ind recurrent neural network** [11069-111]
- 11069 3D **Learning EP-net for identification and segmentation of scanning electron microscopic image** [11069-127]
- 11069 3E **Status recognition method for protecting panel of substation equipment with a mobile phone image** [11069-22]
- 11069 3F **Road recognition based on multi-scale convolutional network with multi-level feature fusion** [11069-28]
- 11069 3G **CNN-based tree species identification from bark image** [11069-63]
- 11069 3H **Tibetan historical document recognition of uchen script using baseline information** [11069-72]
- 11069 3I **Finger vein recognition based on local graph structural coding and CNN** [11069-8]
- 11069 3J **Weber local descriptor with edge detection and double Gabor orientations for finger vein recognition** [11069-61]

SUPER RESOLUTION AND REMOTE SENSING PHOTOGRAPHY

- 11069 3K **Old film image enhancements based on sub-pixel convolutional network algorithm** [11069-119]
- 11069 3L **Algorithm for spectral-spatial remote sensing image super-resolution: multi-sensor case** [11069-1]
- 11069 3M **Tiny face hallucination via boundary equilibrium generative adversarial networks** [11069-130]
- 11069 3N **Information extraction and application ability of residential area based on tiangong-2 images** [11069-154]
- 11069 3O **Deep CNN jointing low-high level feature for image super-resolution** [11069-162]
- 11069 3P **Research of regularization techniques for SAR target recognition using deep CNN models** [11069-5]
- 11069 3Q **Spatio-temporal analysis of Indian urban infrastructure growth using deep learning and 3-channel RGB satellite images** [11069-7]

TARGET DETECTION

- 11069 3R **An outdoors obstacle detection algorithm based on disparity slicing** [11069-114]
- 11069 3S **Road mark detection based on local point cloud projection and R-FCN** [11069-142]
- 11069 3T **A foreground detection algorithm based on improved three-frame difference method and improved Gaussian mixed model** [11069-143]
- 11069 3U **Multi-scale HOG feature used in object detection** [11069-23]
- 11069 3V **An improved YOLOv2 model with depth-wise separable convolutional layers for object detection** [11069-34]
- 11069 3W **Yarn-dyed fabric defect detection based on convolutional neural network** [11069-53]
- 11069 3X **A joint mechanism algorithm for object detection** [11069-58]
- 11069 3Y **Using YOLO-based pedestrian detection for monitoring UAV** [11069-66]
- 11069 3Z **A new algorithm for small moving target detection on dynamic water surface** [11069-9]

VISUAL TRACKING

- 11069 40 **Moving object tracking in video surveillance using YOLOv3 and MeanShift** [11069-86]
- 11069 41 **Covariance intersection fusion for visual tracking with hierarchical features** [11069-79]
- 11069 42 **Refining initial bounding-box for robust visual tracking** [11069-67]
- 11069 43 **A multiple people tracking algorithm for large view scene** [11069-56]
- 11069 44 **Robust real-time contact-point detecting and tracking by a horizontal-vertical enhancement method** [11069-50]
- 11069 45 **Context-learning correlation filters for long-term visual tracking** [11069-39]
- 11069 46 **Combining discriminant embedding and transfer learning for visual tracking** [11069-133]

SIGNAL ANALYSIS AND PROCESSING

- 11069 47 **Action recognition in radio signals based on multi-scale deep features** [11069-135]

- 11069 48 **Expansion of restricted sample for underwater acoustic signal based on generative adversarial networks** [11069-26]
- 11069 49 **A novel nonnegative matrix factorization method for hyperspectral unmixing** [11069-38]
- 11069 4A **The performance comparison of different feature to kernelized correlation filter tracker** [11069-71]
