SPIE

Volume 10963

Proceedings of SPIE 0277-786X, V. 10963

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advanced Etch Technology for Nanopatterning VIII*, edited by Richard S. Wise, Catherine B. Labelle, Proceedings of SPIE Vol. 10963 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$18.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

---

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

---

## KEYNOTE SESSION: PLASMA BASED PATTERNING INNOVATIONS

---

10963 04	<b>Etch aware computational patterning in the era of atomic precision processing (Keynote Paper)</b> [10963-3]
----------	----------------------------------------------------------------------------------------------------------------

---

## MATERIALS AND ETCH INTEGRATION

---

10963 05	<b>Fabrication challenges and opportunities for high-mobility materials: from CMOS applications to emerging derivative technologies (Invited Paper)</b> [10963-4]
10963 06	<b>Metal organic cluster photoresists: new metal oxide systems (Invited Paper)</b> [10963-5]
10963 07	<b>SPARC: a novel technology for depositing conformal dielectric thin films with compositional tuning for etch selectivity (Invited Paper)</b> [10963-6]

---

## PATTERNING PROCESS CONTROL AND COMPUTATIONAL PATTERNING

---

10963 08	<b>Scanner and etch co-optimized corrections for better overlay and CD control</b> [10963-7]
10963 09	<b>Predicting and optimizing etch recipes for across the wafer uniformity</b> [10963-8]
10963 0B	<b>Integrated atomic scale CD control and local variability reduction techniques</b> [10963-10]
10963 0C	<b>Using machine learning technology to accelerate the development of plasma etching processes</b> [10963-11]

---

## ATOMIC LAYER ETCHING AND NOVEL PLASMA TECHNIQUES

---

10963 0E	<b>Peculiarities of selective isotropic Si etch to SiGe for nanowire and GAA transistors</b> [10963-13]
10963 0G	<b>Across-wafer sub-1 nm critical dimension uniformity control by etch tool correction</b> [10963-16]

---

**EUV PATTERNING AND ETCH: JOINT SESSION WITH CONFERENCES 10957 AND 10963**

---

10963 OH     **EUV line-space pattern defect mitigation simulation using Coventor SEMulator3D to enable exposure dose reduction** [10963-17]

---

**PATTERNING SOLUTIONS FOR EMERGING APPLICATIONS**

---

10963 OM     **Ultrahigh selective etching of Si<sub>3</sub>N<sub>4</sub> over SiO<sub>2</sub> using plasma-less dry process for 3D-NAND device applications** [10963-22]

---

**ADVANCED PATTERNING INTEGRATION**

---

10963 OP     **Plasma etch selectivity study and material screening for self-aligned gate contact (SAGC)** [10963-25]

10963 OQ     **Virtual fabrication and advanced process control improve yield for SAQP process assessment with 16 nm half-pitch** [10963-26]

---

**PATTERNING SOLUTIONS FOR EMERGING APPLICATIONS II**

---

10963 OT     **Simulation and optimization of etch on flexible substrates for roll-to-roll processing** [10963-29]
