PROCEEDINGS OF SPIE

Nano-, Bio-, Info-Tech Sensors and 3D Systems III

Jaehwan Kim
Editor

4–6 March 2019
Denver, Colorado, United States

Sponsored by
SPIE

Cosponsored by
OZ Optics, Ltd. (United States)
Polytec, Inc. (United States)

Cooperating Organizations
Jet Propulsion Laboratory (United States)
Colorado Photonics Industry Association (United States)

SPIE

Volume 10969

Proceedings of SPIE 0277-786X, V. 10969

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Nano-, Bio-, Info-Tech Sensors and 3D Systems III*, edited by Jaehwan Kim, Proceedings of SPIE Vol. 10969 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/$18.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*
ix *Conference Committee*

MAN-MACHINE INTERFACE FOR HEALTHCARE

10969 03 **Robust human-machine interfaces enabled by a skin-like, electromyogram sensing system (Invited Paper)** [10969-2]

10969 05 **Polydopamine-nanocellulose nanocomposites: physical and electrical properties for biomedical electrodes** [10969-4]

WEARABLE TECHNOLOGY AND HEALTHCARE

10969 07 **Multifunctional wearable biopatch for real-time monitoring of physiological activities** [10969-6]

10969 08 **Investigation of electrochemical and mechanical coupling effects of micromotion in neural sensing** [10969-7]

10969 0A **Real time label-free monitoring of plasmonic polymerase chain reaction products** [10969-9]

NANOSENSORS AND APPLICATIONS

10969 0C **Modeling surface acoustic wave coupled surface plasmon resonance in layered structures** [10969-11]

3D PRINTING AND SYSTEMS I

10969 0H **Smart additive manufacturing empowered by a closed-loop machine learning algorithm** [10969-17]

3D PRINTING AND SYSTEMS II

10969 0K **Near field electrospinning of nanowires for multi-modal hydrogen sensing** [10969-20]

10969 0M **High-resolution 3D printing magnetically-active microstructures using micro-CLIP process** [10969-22]

10969 0N **Fabrication and characterization of 3D printing flexible capacitive pressure sensor for wearable device and biomechanical applications** [10969-23]

NANOMATERIALS AND APPLICATIONS I

10969 0O **Cellulose nanoporous foam for improving THz gas sensing (Invited Paper)** [10969-24]

10969 0P **Novel superhydrophobic cellulose coating and its multifunctional applications** [10969-25]

10969 0Q **Fabrication of nanocellulose-based long and strong fiber via aligning processes of cellulose nanofibers** [10969-26]

10969 0R **Feasibility of renewable bulk materials processing with nanocellulose** [10969-27]

10969 0S **Cellulose nanoporous foam filled multi-layered split ring THz sensor** [10969-28]

SMART OPTICS

10969 0W **Development of G-Fresnel lens-based μ-spectrometer** [10969-32]

10969 0X **Thin film formation of cellulose nanofiber and its physical properties** [10969-33]

NANOMATERIALS AND APPLICATIONS II

10969 10 **Electrostatic actuation in ionic polymer-metal composites** [10969-36]

10969 11 **Self-deformable varifocal lens based on electroactive gel** [10969-37]

NANOMATERIALS AND APPLICATIONS III

10969 13 **Simultaneous air pressure and velocity measurement using pressure-sensitive flow tracers** [10969-39]

10969 14 **Rechargeable power management system using active balancing for biomedical devices** [10969-40]

10969 17 **Feasibility of PVA-lignin as resin for nanocellulose future composites** [10969-43]

POSTER SESSION

10969 19 **Electrospinning of cellulose nanofiber and poly(vinyl alcohol) blend: experiment and simulation** [10969-45]

10969 1A **Molecular dynamic simulation of cellulose nanofiber to determine its nano-mechanical properties** [10969-46]

10969 1G **Comparison of convective heat transfer of mixed refrigerant and real time monitoring of ORC cycle efficiency according to GTD characteristics** [10969-52]
