Volume 11032

Proceedings of SPIE 0277-786X, V. 11032

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *EUV and X-ray Optics: Synergy between Laboratory and Space VI*, edited by René Hudec, Ladislav Pina, Proceedings of SPIE Vol. 11032 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

REFRACTIVE, ACTIVE, AND MULTILAYER X-RAY OPTICS

11032 08	2D lens array for multi-contrast x-ray imaging [11032-7]
11032 09	Study of Nb-based material combination multilayer for x-ray applications [11032-8]

INTEGRATED DEVICES/SURFACE CHARACTERIZATION

11032 0B	Optical performances of new materials in the EUV spectral range: metrology, methods and results (Invited Paper) [11032-10]
11032 0D	Reactive ion beam etching-based planarization of optical aluminium surfaces [11032-12]
11032 0E	Study of surface quality and subsurface damage of germanium optics produced by single point diamond nanomachining [11032-13]
11032 0F	Examination of EUV CCDs and their applications for space research of solar flares [11032-14]
11032 0G	Superior photodetector based on solution-synthesized perovskite film [11032-15]

COHERENT RADIATION/LASERS

11032 0H	Tomography with compact laser plasma double-stream gas-puff target source of the EUV and SXR radiation [11032-16]
11032 0I	EUV-induced plasmas created using intense ionizing radiation pulses from laser-produced plasma sources [11032-17]
11032 0J	Absolute interferometric testing of an ultra-precise flat substrate with a liquid mirror [11032-18]
11032 0K	Time of flight in electrostatic ion analyser for laser produced plasma ion resolving [11032-19]
11032 0L	Cluster and aerosol targets produced using a gas puff approach for laser-matter interaction experiments [11032-20]

- 11032 0M **Pulsed radiography and tomography of transient and low-density objects using laser plasma sources of extreme ultraviolet (EUV)** [11032-21]
- 11032 0N **Tomographic imaging with the use of a compact soft x-ray microscope based on a laser plasma light source** [11032-22]

FREE-SPACE OPTICS

- 11032 0O **Structure system design of super-resolution space camera** [11032-23]

POSTER SESSION

- 11032 0P **Global optimization of two-multilayer mirror objective for focusing soft x-ray high harmonics** [11032-26]
- 11032 0Q **Multilayer polarizers at the energy range 50-1000eV** [11032-27]
- 11032 0R **Fabrication of a two-dimensional graded periodic Mo/Si multilayer mirror using magnetron sputtering technology** [11032-28]
- 11032 0U **A comparison of customized Hartmann and newly introduced inverted Hartmann masks for single-shot phase-contrast x-ray imaging** [11032-31]
- 11032 0V **EUV reflective ellipsometry in laboratory: determination of the optical constants and phase retarder properties of SiO₂ at hydrogen Lyman-alpha** [Best Student Paper Award] [11032-32]
- 11032 0W **Silicon carbide detectors for diagnostics of laser-produced plasmas** [11032-33]
- 11032 0X **A newly developed ultra-sensitive Faraday optical rotation device** [11032-34]
- 11032 0Y **Use of opportunities of contact microscopy: optical design** [11032-35]
- 11032 10 **Amplitude spiral zone plates for generation of optical vortices** [11032-37]
- 11032 11 **Analysis of focusing properties of amplitude zone plates** [11032-38]
- 11032 12 **Photonic jets for mid-IR focal plane arrays based on triangular dielectric prism** [11032-39]
- 11032 13 **Interferometric precision measurement of highly reflective thin film using wavelength tuning Fizeau interferometry** [11032-40]
- 11032 15 **Analysis of transfer function dependence on configuration of acousto-optic interaction in uniaxial crystals** [11032-46]
