Volume 11033

Proceedings of SPIE 0277-786X, V. 11033

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power, High-Energy, and High-Intensity Laser Technology IV*, edited by Joachim Hein, Thomas J. Butcher, Proceedings of SPIE Vol. 11033 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

JOINT SESSION: HIGH-PEAK POWER LASERS

11033 03	Scaling of petawatt-class lasers to multi-kHz repetition rates (Invited Paper) [11033-1]
11033 06	Monocrystalline materials for high-power ultrafast lasers (Invited Paper) [11033-4]

NOVEL LASER AND MEASUREMENT CONCEPTS

11033 0A	Using photon momentum to measure high CW laser power and pulse energy [11033-8]
11033 0B	Measurement of mid-frequency wavefront error for large optics with ptychographical iterative engine [11033-9]

MID-INFRARED LASERS

11033 0D	Active and passive Q-switched tunable mJ level Tm laser (Best Student Paper Award) [11033-10]
11033 0E	Diode-pumped cryogenic Tm:LiYF₄ laser [11033-11]
11033 0F	Passively Q-switched Er,La:SrF₂-CaF₂ laser at 2.74 μm [11033-12]
11033 0G	Compact CW mid-IR Fe:ZnSe coherent source pumped by Er:ZBLAN fiber laser [11033-13]
11033 0H	Tm, Ho:GGAG crystal for 2.1 μm tunable diode-pumped laser [11033-14]

NONLINEAR FREQUENCY CONVERSION

11033 0I	High-power dual mode IR and NIR OPCPA (Invited Paper) [11033-15]
----------	---

- 11033 OJ **Characteristics of a high-power picosecond mid-IR parametric generator/amplifier tunable between 1.5 and 3.2 μm** [11033-16]
- 11033 OK **Generation of high-energy mid-infrared pulses via dual-chirped OPA** [11033-17]

NOVEL LASER MATERIALS AND DEVICES

- 11033 OO **Optical anisotropic coatings for polarization control in high-power lasers** [11033-21]

THIN DISC FIBER LASERS AND PHASE LOCKING

- 11033 OT **Investigation on the influence of pointing deviation on beam quality in dual-grating spectral beam combination** [11033-28]

POSTER SESSION

- 11033 OX **Temperature dependence of the dysprosium oxide (Dy_2O_3) based ceramics Verdet constant** [11033-30]
- 11033 OY **Temperature dependence of Cr:ZnSe active medium spectral and laser properties** [11033-31]
- 11033 OZ **Tunable cryogenic Tm:CaF₂-SrF₂ laser** [11033-32]
- 11033 IO **Yb:YAG/Cr:YAG microchip laser output energy optimization** [11033-33]

ADDITIONAL PAPER

- 11033 14 **Experimental investigation of a high-power 1018 nm monolithic tandem pump fiber source using 20/400 μm Yb-doped fiber** [11033-225]
