SPIE

Volume 11014

Proceedings of SPIE 0277-786X, V. 11014

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Ocean Sensing and Monitoring XI*, edited by Weilin "Will" Hou, Robert A. Arnone, Proceedings of SPIE Vol. 11014 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$18.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

UNDERWATER LIDAR AND IMAGING

11014 03	LIDAR systems operating in the presence of oceanic turbulence (Invited Paper) [11014-2]
11014 04	LED communicator in various underwater environments [11014-3]
11014 06	Spatial coherence filtering for scatter rejection in underwater laser systems [11014-6]
11014 08	Fast focus of attention for corals from underwater images [11014-27]

OCEAN COLOR REMOTE SENSING I

11014 09	The hyperspectral signatures of complex ocean frontal boundaries: The example of cold air outbreaks in the northern Gulf of Mexico [11014-8]
11014 0A	An initial approach for using chromaticity to develop hyperspectral signals for satellite multispectral ocean-color imagery [11014-9]
11014 0B	Delineation of suspended solids in river outflow from Hurricane Florence using GOES-16 ABI data [11014-10]
11014 0C	Establishing optimal matchup protocols between ocean color satellites and ground truth AeroNET-OC radiance [11014-11]

NOVEL OCEAN SENSING METHODS

11014 0E	Deep learning for remote sensed target classification in maritime satellite radar images [11014-13]
11014 0F	Total and polarized radiance from the ocean surface from hyperspectral polarimetric imaging [11014-14]
11014 0H	Response of sea surface properties following Gulf of Mexico hurricanes [11014-16]
11014 0J	Impact of oceanic turbulence on coherent laser communications [11014-18]

11014 0K **Tailored information provision for multinational naval operations** [11014-19]

SEA SURFACE TEMPERATURE (SST)

11014 0L **Towards high-resolution multi-sensor gridded ACSPO SST product: reducing residual cloud contamination (Invited Paper)** [11014-20]

11014 0O **Status of second VIIRS reanalysis (RAN2)** [11014-23]

11014 0P **MODIS thermal emissive bands calibration stability using in-situ ocean targets and remotely-sensed SST retrievals provided by the group for high resolution sea surface temperature** [11014-24]

11014 0Q **Mitigation of the GOES-17 ABI performance issues in the NOAA ACSPO SST products** [11014-25]

POSTER SESSION

11014 0S **Structural field analysis of a large eddy turbulent flow simulation using probabilistic graphical modeling** [11014-28]
