

PROCEEDINGS OF SPIE

# ***Optical Technologies for Telecommunications 2018***

**Vladimir A. Andreev**  
**Anton V. Bourdine**  
**Vladimir A. Burdin**  
**Oleg G. Morozov**  
**Albert H. Sultanov**  
*Editors*

**20–22 November 2018**  
**Ufa, Russian Federation**

*Organized by*  
Ufa State Aviation Technical University (Russian Federation)  
Povolzhskiy State University of Telecommunications and Informatics (Russian Federation)  
Kazan National Research Technical University (Russian Federation)

*Published by*  
SPIE

**Volume 11146**

Proceedings of SPIE 0277-786X, V. 11146

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Technologies for Telecommunications 2018*, edited by Vladimir A. Andreev, Anton V. Bourdine, Vladimir A. Burdin, Oleg G. Morozov, Albert H. Sultanov, Proceedings of SPIE Vol. 11146 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

---

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

ix	<i>Authors</i>
xi	<i>Conference Committee</i>
xiii	<i>Introduction</i>

---

SESSION 1      OPTICAL TELECOMMUNICATION TECHNOLOGIES AND SYSTEMS

---

11146 02	Effect of material third-order frequency dispersion on pulse distortions in an optical fiber [11146-46]
11146 03	Evaluation of DWDM systems design with ultrabroadband optical amplifiers [11146-24]
11146 04	Improving the fiber Bragg grating apodization efficiency in the DWDM systems [11146-14]
11146 05	Methods of coherent networks matching with codecs computational capabilities (Invited Paper) [11146-23]
11146 06	Mobile phone with 3D display [11146-27]
11146 07	Propagation of non-dispersive soliton-like vortexes in the optical segment of radio-over-fiber systems in the range 75-110 GHz [11146-29]
11146 08	Simulation of long-haul two-mode fiber-optic link with differential mode delay managing [11146-35]
11146 09	Simulation of pulses propagation in a waveguide with a diffraction grating using high-performance computer systems [11146-38]
11146 0A	Simulation of statistical characteristics of aperture random antenna by triad-cluster method [11146-9]
11146 0B	Statistics of the Kerr-nonlinearities and linear mode coupling interaction in the few mode fiber optical communications [11146-22]
11146 0C	The quadrature modulation of quaternion signals for capacity upgrade of high-speed fiber-optic wireless communication systems [11146-45]
11146 0D	Model of end-to-end latency for optical network based on Network Calculus [11146-70]

SESSION 2 PASSIVE AND ACTIVE COMPONENTS OF OPTICAL TELECOMMUNICATIONS

---

- 11146 0E Acousto-optic properties of heterogeneous media [11146-28]
- 11146 0F An anisotropic diffractive optical element for generating hybrid-polarized beams [11146-10]
- 11146 0G Analysis of electron-photon interaction processes, exciting a polariton field, and the choice of an effective metal-dielectric structure to maintain this effect [11146-17]
- 11146 0H Analysis of the amplitude on optical axis at the incidence of the conical wave on an astigmatic lens [11146-36]
- 11146 0I Analytical model of electron-photon linear and nonlinear interaction in crystalline nanostructured siall [11146-18]
- 11146 0J Coherence and polarization effects of light diffraction by microlens arrays [11146-41]
- 11146 0K Diffraction catastrophes and asymptotic analysis of caustics from axisymmetric optical elements [11146-21]
- 11146 0L Edge detector based on wavelet transform energy attributes [11146-3]
- 11146 0M Investigation of microwave signals radiophoton mixer performed on two electro-optical modulators [11146-7]
- 11146 0N Modeling and research of the orbital angular momentum conservation of vortex laser beams propagating in a random optical medium [11146-1]
- 11146 0O Multi-projector 3D display [11146-34]
- 11146 0P Nonlinear effects in photoinduced nanomovement of carbazole-based azo-polymers [11146-47]
- 11146 0Q On the creation of radiophoton devices for the generation and processing of radio frequency signals [11146-8]
- 11146 0R Optical vector analyzer based on carrier-suppressed double-sideband modulation and phase-shift fiber Bragg grating [11146-64]
- 11146 0S Phase contrast Zernike method with dynamic transparent application [11146-40]
- 11146 0T Splitting of laser beam by microlens array [11146-42]
- 11146 0U Statistical modeling of the dependence between random interference pattern objects [11146-30]
- 11146 0V Study of the beam intensity redistribution in the focal plane of diffractive optical element [11146-16]

- 11146 0W Technological line for creation and research of diffractive optical elements (Invited Paper) [11146-43]
- 11146 0X The analytical formula for estimating a coupling of modes at the joint of optical fibers with angular mismatch [11146-49]
- 11146 0Y Towards multi-aperture imaging using diffractive lens [11146-32]
- 11146 0Z Vortex modes coupling induced by fiber imperfections and non-regularities [11146-12]
- 11146 10 Analytical solution for mode coupling coefficients at the joint of optical fibers with axial mismatch [11146-55]
- 11146 11 Experimental approbation of technique for writing of cascaded precision microstructured defects in silica graded index multimode optical fibers [11146-58]
- 11146 12 Design of precision spatial scheme for MDM-multiplexer channel positioning at the core end of silica 100- $\mu\text{m}$ -core multimode optical fiber [11146-54]
- 11146 13 Influence of electric field distribution on the charged particles kinetics of the off-electrode plasma formed by high-voltage gas discharge [11146-26]
- 11146 14 Design of MDM-multiplexer channel precision spatial positioning scheme at the core end of a few-mode optical fiber with asymmetrically distorted core geometry [11146-57]
- 11146 15 Research of laser beam profile structure dependence on micro-lensed optical fiber configuration [11146-53]
- 11146 16 Solution for the twomode propagation of LP<sub>01</sub> and LP<sub>11</sub> modes in a step-index optical fiber with the Kerr nonlinearity taking into account [11146-48]

---

SESSION 3 ONE-DIMENSION AND MULTI-DIMENSION OPTICAL SIGNALS DATA PROCESSING

- 11146 17 Advanced modulation and precoding techniques for OFDM based radio-over-fiber systems operating in W-band [11146-33]
- 11146 18 Algorithm for restoring the differential mode delay map from the set of pulse responses at the far end of fiber optic link [11146-39]
- 11146 19 Computed tomography data processing method on the basis of spatial segmentation [11146-19]
- 11146 1A Holographic method of error-correcting coding [11146-31]
- 11146 1B Nonlinear impairments mitigation using signal compression [11146-44]

- 11146 1C Processing multidimensional optical signals for measurement solid deforming [11146-20]
- 11146 1D Spinor approach to wave processes analysis in nonlinear medium (Invited Paper) [11146-15]

SESSION 4 OPTICAL NETWORKS MAINTENANCE, CONTROL AND RESTORATION

---

- 11146 1E Addressed FBG-structures for tire strain measurement [11146-6]
- 11146 1F Monitoring system for control of tension in fiber optic communication lines [11146-69]
- 11146 1G Research of influence of external factors on quality of aerial optical cables installation at low temperatures [11146-68]
- 11146 1H Some approaches to predicting the optical cable lifetime [11146-37]
- 11146 1I Temperature distribution monitoring system for fiber optic communication lines [11146-25]
- 11146 1J Tire dynamic monitoring setup based on microwave photonic sensors [11146-5]
- 11146 1K Aero-acoustic cartography as nondestructive method for turbomachine rotor blade monitoring based on fiber optic sensors localized at a nozzle cross section [11146-65]
- 11146 1L Application of the polarization reflectometry for estimating the distribution of mechanical stress in optical fiber [11146-51]
- 11146 1M Chromatic dispersion monitoring based on Bragg notch filter central frequency polyharmonic probing [11146-66]
- 11146 1N Development and approbation of procedure for automated localization of fiber optic connector contaminated ferrule end face image artifacts [11146-56]
- 11146 1O Investigation of the polarization characteristics of Brillouin scattering [11146-67]
- 11146 1P Investigation of the vibration influences on the optical fiber polarization characteristics [11146-52]
- 11146 1Q Selection of generalized Haar wavelet scaling coefficients providing minimization of non-reflective OTDR event localization error [11146-61]

SESSION 5 POWER TECHNOLOGIES FOR INFOCOMMUNICATIONS

---

- 11146 1R Point and quasi-distributed monitoring of digital electric power grids based on addressable fiber optic technologies [11146-63]

11146 1S Psychological and pedagogical support of the professional competencies formation for telecommunications specialists [11146-4]
