

PROCEEDINGS OF SPIE

Algorithms for Synthetic Aperture Radar Imagery XXVI

**Edmund Zelnio
Frederick D. Garber**
Editors

**18 April 2019
Baltimore, Maryland, United States**

Sponsored and Published by
SPIE

Volume 10987

Proceedings of SPIE 0277-786X, V. 10987

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Algorithms for Synthetic Aperture Radar Imagery XXVI*, edited by Edmund Zelnio, Frederick D. Garber, Proceedings of SPIE Vol. 10987 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

ADVANCED SENSOR TECHNOLOGIES

10987 02	The 3D complex damped exponential Cramer-Rao estimation bound and algorithms [10987-1]
10987 03	Effects of region of interest selection on phase history based SAR moving target autofocus [10987-2]
10987 07	Multi-sensor synthetic data generation to performance characterization [10987-7]

SYNTHETIC APERTURE RADAR TARGET RECOGNITION

10987 0C	Realistic SAR data augmentation using machine learning techniques [10987-12]
10987 0G	A deep learning approach to the Synthetic and Measured Paired and Labeled Experiment (SAMPLE) challenge problem [10987-16]
10987 0H	A SAR dataset for ATR development: the Synthetic and Measured Paired Labeled Experiment (SAMPLE) [10987-17]
10987 0I	Synthetic data accuracy sensitivity to CAD model accuracy using ATR-based metrics [10987-18]
10987 0K	A performance modeling framework for large scale synthetically derived performance estimates [10987-20]
10987 0L	Articulation study for SAR ATR baseline algorithm [10987-21]
