PROCEEDINGS OF SPIE

Automatic Target Recognition XXIX

Riad I. Hammoud
Timothy L. Overman
Editors

15–18 April 2019
Baltimore, Maryland, United States

Sponsored by
SPIE

Cosponsored by
Lockheed Martin Corporation

Published by
SPIE

Volume 10988

Proceedings of SPIE 0277-786X, V. 10988

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Automatic Target Recognition XXIX*, edited by Riad I. Hammoud, Timothy L. Overman, Proceedings of SPIE Vol. 10988 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*

ix *Conference Committee*

xi *Introduction*

ADVANCED ALGORITHMS IN ATR I

10988 04 **HySARNet: a hybrid machine learning approach to synthetic aperture radar automatic target recognition** [10988-7]

10988 05 **Shape-based ATR for wide-area processing of satellite imagery (Invited Paper)** [10988-8]

10988 06 **Discrimination of forests and man-made targets in SAR images based on spectrum analysis** [10988-9]

ADVANCES IN MACHINE LEARNING FOR ATR I

10988 07 **Explainable automatic target recognition (XATR)** [10988-2]

10988 08 **A comparison of target detection algorithms using DSIAC ATR algorithm development data set** [10988-3]

10988 09 **Fundamentals of target classification using deep learning (Best Student Paper Award)** [10988-4]

10988 0A **Simple linear regression model based data clustering** [10988-5]

ADVANCED ALGORITHMS IN ATR II

10988 0C **Fast and robust detection of oil palm trees using high-resolution remote sensing images** [10988-11]

10988 0D **Semantic segmentation based large-scale oil palm plantation detection using high-resolution satellite images** [10988-12]

ADVANCED ALGORITHMS IN ATR III

10988 0F **Design of adversarial targets: fooling deep ATR systems** [10988-15]

10988 0G **Comparing classifiers that exploit random subspaces** [10988-26]

10988 0H **Radar target recognition using wavelet-based features extracted from compressively sensed signatures** [10988-27]

ADVANCES IN MACHINE LEARNING FOR ATR II

10988 0K **On generalization of deep learning recognizers in overhead imagery (Invited Paper)** [10988-18]

10988 0L **Automatic machine learning for target recognition** [10988-19]

10988 0M **Multisource deep learning for situation awareness** [10988-20]

10988 0N **Characterization of CNN classifier performance with respect to variation in optical contrast, using synthetic electro-optical data** [10988-21]

ADVANCED ALGORITHMS IN ATR IV

10988 0O **Fast and accurate target detection in overhead imagery using double convolution neural networks (Invited Paper)** [10988-22]

10988 0P **Neural network classification of degraded imagery using soft labels: towards human-level performance with "accurate" likelihoods?** [10988-23]

10988 0Q **Manifestly positive series approximation to probability densities** [10988-24]

10988 0R **Physically realizable adversarial examples for convolutional object detection algorithms** [10988-25]

ADVANCED ALGORITHMS IN REMOTE SENSING I

10988 0T **Transfer learning for aided target recognition: comparing deep learning to other machine learning approaches** [10988-29]

10988 0V **Deep learning based super resolution of aerial and satellite imagery** [10988-43]

10988 0Y **Generalization ability of region proposal networks for multispectral person detection (Best Paper Award)** [10988-33]

10988 0Z **Modeling the performance of modern sensor systems (Invited Paper)** [10988-41]

ADVANCED ALGORITHMS IN REMOTE SENSING II

10988 11 **Cross-spectral face recognition with image quality disparity using image fusion** [10988-35]

10988 13 **Nighttime periocular recognition at long standoffs with deep learned features** [10988-37]

10988 14 **The development of synthetic thermal image generation tools and training data at FLIR** [10988-38]

10988 15 **Real-time beacon identification using linear and kernel (non-linear) Support Vector Machine, Multiple Kernel Learning (MKL), and Light Detection and Ranging (LIDAR) 3D data** [10988-39]

10988 16 **iECO learned matched filters for automatic target recognition in synthetic midwave infrared imagery** [10988-40]

10988 17 **Research on image processing and intelligent recognition of space debris** [10988-42]
