

PROCEEDINGS OF SPIE

Fiber Optic Sensors and Applications XVI

**Robert A. Lieberman
Glen A. Sanders
Ingrid U. Scheel**

Editors

**16–17 April 2019
Baltimore, Maryland, United States**

Sponsored and Published by
SPIE

Volume 11000

Proceedings of SPIE 0277-786X, V. 11000

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fiber Optic Sensors and Applications XVI*, edited by Robert A. Lieberman, Glen A. Sanders, Ingrid U. Scheel, Proceedings of SPIE Vol. 11000 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 DISTRIBUTED FIBER OPTIC SENSORS

- 11000 02 **Commercial boiler test for distributed temperature sensor based on wavelength-multiplexed sapphire fiber Bragg gratings [11000-1]**
- 11000 03 **Enhanced performance of Brillouin distributed fiber sensor with hybrid amplification [11000-2]**
- 11000 04 **Self-correction of nonlinear sweep of tunable laser source in OFDR [11000-3]**
- 11000 05 **Simultaneous distributed strain and temperature measurement using a dual-Brillouin-peak optical fiber [11000-4]**
- 11000 06 **Distributed polarization state sensing with optical frequency domain reflectometry [11000-5]**
- 11000 07 **Fully distributed optical fiber sensor for water and humidity monitoring [11000-6]**

SESSION 2 APPLICATIONS OF FIBER OPTIC SENSORS AND SYSTEMS

- 11000 08 **Personal reflections on fiber optic gyros mid-1970s to the present [11000-7]**
- 11000 09 **Studies of the optical bandwidth of a 25 W 2 μ m band PM hybrid Ho-/Tm-doped fiber amplifier [11000-8]**
- 11000 0A **Generating supercontinuum in dispersion varying As₂S₃ waveguides [11000-9]**
- 11000 0B **Optical fiber Fabry-Perot interferometer based embeddable strain sensor with 30 nano-strain resolution [11000-10]**
- 11000 0C **Performance assessment of interferometric sensing [11000-11]**
- 11000 0D **Low-cost fabrication of functional plasmonic fiber-optic-based sensors using microsphere photolithography [11000-12]**

SESSION 3 FIBER OPTIC SENSING IN HARSH ENVIRONMENTS

- 11000 0E **Extracting pressure and temperature from high speed fiber grating sensor data associated with energetic material tests** [11000-13]
- 11000 0G **Fabrication and on-line evaluation of single crystal fiber via laser-heated pedestal growth** [11000-16]

SESSION 4 NOVEL METHODS IN FIBER OPTIC SENSING

- 11000 0H **Fiber-based dosimeters for applications in radiotherapy** [11000-17]
- 11000 0I **Two-photon absorption effect on pseudorandom bit sequence for high speed operation** [11000-18]
- 11000 0J **Fabrication and evaluation of sapphire fiber cladding via magnesium aluminate spinel sol-gel based approaches** [11000-19]

POSTER SESSION

- 11000 0M **Displacement and strain measurement up to 1000 °C using a hollow coaxial cable Fabry-Perot resonator** [11000-22]
- 11000 0N **Truly distributed coaxial cable sensing based on random inhomogeneities** [11000-23]
- 11000 0O **5th order rational harmonic mode-locked fiber ring laser corresponding to 50 GHz pulse train** [11000-24]
- 11000 0P **Reduction of directivity of the fiber-optic water flow sensor based on laser-heated silicon Fabry-Perot cavity by using a spherical Tin shell** [11000-25]
- 11000 0Q **Design considerations of a fiber interferometric magnetic sensor** [11000-26]
