Volume 11025

Proceedings of SPIE 0277-786X, V. 11025

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Metamaterials XII*, edited by Vladimír Kuzmiak, Peter Markos, Tomasz Szoplík, Proceedings of SPIE Vol. 11025 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

TUNABLE METAMATERIALS

11025 03	Polar metamaterials with graded air inclusions for infrared radiation managing (Invited Paper) [11025-2]
----------	--

APPLICATIONS OF METAMATERIALS

11025 06	Directionality fields generated by a local Hilbert transform in optics (Invited Paper) [11025-6]
----------	--

PHOTONIC TOPOLOGICAL INSULATORS AND THEIR APPLICATIONS

11025 0A	Photonic analogues of the Haldane and Kane-Mele models (Invited Paper) [11025-7]
----------	--

HYPERBOLIC METAMATERIALS AND REFRACTIVE INDEX MATERIALS

11025 0D	Subwavelength confinement of light in hyperbolic metamaterials with dielectric nanoparticle coupling [11025-17]
11025 0E	Metamaterials: opportunities in medical imaging (Invited Paper) [11025-15]
11025 0G	Tunable and asymmetric transmission of light in visible spectrum [11025-19]

METASURFACES AND FLAT OPTICS

11025 0J	High refractive index dielectric rings in liquid crystals as tunable metasurfaces [11025-21]
11025 0K	Accelerating beam generation via all-dielectric metasurfaces [11025-22]

11025 0N Switchable optical metasurfaces based on nematic liquid crystal [11025-10]

ANALYTICAL AND NUMERICAL MODELING OF METAMATERIALS

11025 0O Metamaterials approach for infrared radiation manipulation in dispersed nanowires systems (Invited Paper) [11025-25]

11025 0P Plasmon resonance in subwavelength gratings: influence of incident beam width [11025-26]

11025 0Q The exact Dispersive Quasi-Normal Mode (DQNM) expansion for photonic structures with highly dispersive media in unbounded geometries (Best Student Paper Award) [11025-27]

11025 0S Electric and magnetic dipole and quadrupole coupling in an effective medium description of amorphous arrays of optical nanoresonators (Best Student Paper Award) [11025-29]

PLASMONICS: FUNDAMENTALS AND APPLICATIONS

11025 0U Investigating optical properties of gold nanorod arrays [11025-31]

11025 0V Plasmon-enhanced absorption in heterojunction n-ZnO_{nanorods}/p-Si solar cells [11025-32]

POSTER SESSION

11025 0Y Reflection controlling metasurfaces for solar cell applications [11025-36]

11025 0Z Focusing of laser light by sectoral spiral metalens [11025-38]

11025 12 Plasmonic nanoparticles modified by dimercaptostilbene for metamaterials [11025-41]

11025 16 Optical properties of molecular clusters of cyanine dyes on Ag and Au island films [11025-47]

11025 18 Energy backflow in in a tightly focused high-order cylindrical vector beam [11025-49]
