Volume 11029

Proceedings of SPIE 0277-786X, V. 11029

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Micro-structured and Specialty Optical Fibres VI*, edited by Kyriacos Kalli, Alexis Mendez, Pavel Peterka, Proceedings of SPIE Vol. 11029 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$18.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

SESSION 1 PHOTONIC CRYSTAL FIBERS AND HOLLOW CORE FIBERS

11029 04	OH diffusion effects at preparation of antiresonant hollow core fibers [11029-5]
----------	---

SESSION 2 MID-IR AND INFRARED FIBERS AND COHERENT SOURCES

11029 08	Spectroscopic characterization of holmium-doped optical fibers for fiber lasers [11029-8]
11029 09	Experimental investigation and characterization of fabrication shaped clad optical fiber by thermally polishing optical fiber preforms with CO₂ laser [11029-9]

SESSION 3 FIBER BRAGG GRATINGS AND POLYMER OPTICAL FIBERS

11029 0C	Ultrafast fiber Bragg grating inscription in DPDS-core doped POF using 325 nm laser [11029-12]
11029 0E	Direct core-selective inscription of Bragg grating structures in seven-core optical fibers by femtosecond laser pulses [11029-14]
11029 0F	Femtosecond laser plane-by-plane Bragg gratings for monolithic Thulium-doped fibre laser operating at 1970 nm [11029-15]

SESSION 4 OPTICAL FIBERS FOR BIOMEDICAL APPLICATIONS

11029 0K	Towards poly(D,L-lactic acid)-based biodegradable and biocompatible polymer optical fiber (Best Student Paper Award) [11029-20]
----------	--

SESSION 5 SENSORS AND DEVICES BASED ON SPECIALTY FIBERS

11029 0L	RGB wavelength demultiplexer based on PCF/POF structure [11029-30]
----------	---

11029 0M **Pulse compression in defective core photonic crystal fiber** [11029-23]

11029 0N **Depolarization of light in optical fibers** [11029-24]

SESSION 6 MODELLING AND ANALYSIS OF SPECIALTY FIBERS AND COMPONENTS

11029 0Q **Complete dispersion characterization of microstructured optical fibers using windowed Fourier-transform spectral interferometry** [11029-27]

11029 0R **Strongly coupled multi-core fiber-based interferometer for high temperature sensing** [11029-28]

11029 0S **Combined implementation of controllable beam splitting and wavelength division multiplexing using tunable interference wedged structures** [11029-29]

POSTER SESSION

11029 0T **Arrays of microstructured MIR fibers based on silver halides for medical applications** [11029-31]

11029 0U **Microscopic mechanisms of radiation-induced light attenuation in pure silica-core fibers: influence of heat treatment in the process of metal and polyimide coating application** [11029-32]

11029 0V **Gamma-radiation-induced attenuation of light in polarization-maintaining pure-silica-core PANDA fibers** [11029-33]

11029 0Y **Coupling of self-written waveguides (SWW) in photopolymer and reverse manipulation** [11029-36]

11029 10 **Capillary optical fiber with a Bragg mirror of arsenic sulfide and polymers applied onto the inner capillary wall** [11029-39]

11029 11 **High-power laser tests of phosphate glass-based bioresorbable optical fibers transmission** [11029-40]
