PROCEEDINGS OF SPIE

Fourteenth International Conference on Quality Control by Artificial Vision

Christophe Cudel
Stéphane Bazeille
Nicolas Verrier
Editors

15–17 May 2019
Mulhouse, France

Organized by
Université de Haute-Alsace (France)

Sponsored by
Mulhouse Alsace Agglomération (France)
Région Grand-Est (France)
IDS GmbH (Germany)

Published by
SPIE

Volume 11172

Proceedings of SPIE 0277-786X, V. 11172

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Fourteenth International Conference on Quality Control by Artificial Vision*, edited by Christophe Cudel, Stéphane Bazeille, Nicolas Verrier, Proceedings of SPIE Vol. 11172 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*

ix *Conference Committee*

xiii *Introduction*

PLENARY SESSION

11172 02 Optical metrology based on coherent phase imaging: applications to 3D deformation measurements and vibrations analysis (Plenary Paper) [11172-101]

11172 03 An equivalent F-number for light field systems: light efficiency, signal-to-noise ratio, and depth of field (Plenary Paper) [11172-102]

IMAGE ANALYSIS I

11172 04 Vision based evaluation of the contamination level in high resolution images for industrial and clinical quality control applications [11172-36]

11172 05 Linear classification of chairlift images for presence analysis [11172-55]

11172 06 Data augmentation for intra-class imbalance with generative adversarial network [11172-56]

11172 07 Method for image registration of symmetrical objects with changing edges and less structural information [11172-72]

SURFACE CHARACTERIZATION

11172 08 Machine learning approaches for defect classification on aircraft fuselage images aquired by an UAV [11172-10]

11172 09 Deflectometric data segmentation based on fully convolutional neural networks [11172-69]

11172 0A Light spatial distribution calibration based on local density estimation for reflectance transformation imaging [11172-90]

11172 0B Pseudo normal image generation for anomaly detection on road surface [11172-96]

11172 0C Moisture measurement for quality and control applications [11172-99]

NON-CONVENTIONAL IMAGING

11172 0D Principal component analysis in non-destructive testing by an ultrasonic thermography method of multi-layered aramid composite [11172-15]

11172 0E Phase detection of an alternating laser heat source in infrared images using Bayesian recursive filtering [11172-67]

11172 0F A simplified approach for tomographic diffractive microscopy [11172-89]

DEEP LEARNING I

11172 0G Potato defects classification and localization with convolutional neural networks [11172-28]

11172 0H Visual inspection for metallic surfaces: CNN driven by features [11172-38]

11172 0I On-the-fly generated data for industrial part orientation estimation with deep neural networks [11172-80]

11172 0J Identifying solar panel defects with a CNN [11172-93]

11172 0K Improving pedestrian detection using convolutional neural network and saliency detection [11172-97]

DEEP LEARNING II

11172 0L Mass production quality control of welds based on image processing and deep learning in safety components industry [11172-13]

11172 0M Deep learning approach for artefacts correction on photographic films [11172-35]

11172 0N Automated vision system for crankshaft inspection using deep learning approaches [11172-78]

11172 0O Training time reduction for network architecture search using genetic algorithm [11172-81]

IMAGE ANALYSIS II

11172 0P Quick roughness evaluation of cut edges using a convolutional neural network [11172-4]

11172 0Q Non-invasive control and scoring of psoriasis severity [11172-14]

11172 0R Binarization of the gray scale images of droplets during dropwise condensation on textured surfaces [11172-37]

11172 0S Kurtosis-based connected components method for detecting small and transparent foreign bodies in semi opaque bottles [11172-66]

11172 0T Anomaly detection of solder joint on print circuit board by using Adversarial Autoencoder [11172-84]

3D AND SLAM

11172 0U 3D point cloud analysis for automatic inspection of aeronautical mechanical assemblies [11172-61]

11172 0V Deflectometry based inline inspection of linearly moving plastic parts [11172-62]

11172 0W A review of the dataset available for visual odometry [11172-77]

11172 0X Automatic camera pose estimation based on a flat surface map [11172-85]

11172 0Y Scattering imaging system with dual configurations [11172-95]

SURFACE ANALYSIS

11172 0Z Learning to classify materials using Mueller imaging polarimetry [11172-1]

11172 10 Detecting alterations in historical violins with optical monitoring [11172-58]

11172 11 Application of spectral statistics to surface defect detection [11172-60]

11172 12 Unsupervised accumulated aggregation shifting for robust defect detection in real industry [11172-76]

11172 13 High dynamic range reflectance transformation imaging: an adaptive multi-light approach for visual surface quality assessment [11172-88]

POLARIMETRIC IMAGING

11172 14 A system for home appliance operation by hand waving in a user-definable command space [11172-27]

11172 15 Using polarimetric imaging for automatic segmentation of weld pool [11172-54]

11172 16 Calibration for polarization filter array cameras: recent advances [11172-79]

11172 17 Polarimetric imaging for quality control in injection molding [11172-92]

11172 18 Adapted learning for polarization-based car detection [11172-98]

MULTI-VIEW AND TRACKING

11172 19 Classification of hand over face gestures using deep learning [11172-29]

11172 1A Multiple human tracking with dual cost graphs [11172-57]

11172 1B New noise reduction method based on FPGA for a stereoscopic video system [11172-59]

11172 1C Benchmarking of several disparity estimation algorithms for light field processing [11172-75]

POSTER SESSION

11172 1D Small target tracking using KCF and adaptive thresholding [11172-9]

11172 1E Craks detection on glass objet based on active thermography approach [11172-16]

11172 1F Stability of the metrological texture feature using colour contrast occurrence matrix [11172-25]

11172 1G End-to-end defect detection in automated fiber placement based on artificially generated data [11172-68]

11172 1H Recurrent ensemble boosting based method for detecting small and transparent foreign bodies in semi-opaque containers [11172-70]
