

PROCEEDINGS OF SPIE

Pattern Recognition and Tracking XXX

Mohammad S. Alam
Editor

15–16 April 2019
Baltimore, Maryland, United States

Sponsored and Published by
SPIE

Volume 10995

Proceedings of SPIE 0277-786X, V. 10995

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Pattern Recognition and Tracking XXX*, edited by Mohammad S. Alam, Proceedings of SPIE Vol. 10995 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 NOVEL PATTERN RECOGNITION TECHNIQUES

- 10995 02 **Improved visible to IR image transformation using synthetic data augmentation with cycle-consistent adversarial networks (Invited Paper)** [10995-1]
- 10995 04 **Neural network in a multi-agent system for line detection task in images** [10995-3]
- 10995 05 **Target tracking and classification directly in compressive measurement for low quality videos** [10995-4]
- 10995 06 **Compressive object tracking and classification using deep learning for infrared videos** [10995-5]

SESSION 2 TARGET TRACKING AND CLASSIFICATION

- 10995 07 **Small target detection for search and rescue operations using distributed deep learning and synthetic data generation** [10995-6]
- 10995 08 **Automatic pavement crack classification on two-dimensional VIAPIX images** [10995-7]
- 10995 09 **Robust infrared target tracking using thermal information in mean-shift** [10995-8]

SESSION 3 CORRELATION BASED RECOGNITION

- 10995 0B **Taking correlation from 2D to 3D: optical methods and performance evaluation (Invited Paper)** [10995-10]
- 10995 0C **Nonparametric kernel smoothing classification to enhance optical correlation decision performances** [10995-11]
- 10995 0E **Hardware design of correlation filters for target detection** [10995-13]
- 10995 0F **Wireless charging pad detection and alignment using a fisheye camera for electric vehicles** [10995-14]

SESSION 4 DEEP LEARNING BASED RECOGNITION

- 10995 OG **Suitability of features of deep convolutional neural networks for modeling somatosensory information processing** [10995-16]
- 10995 OI **Optimized training of deep neural network for image analysis using synthetic objects and augmented reality** [10995-18]
- 10995 OK **Actionable surveillance identification (ASI)** [10995-20]

SESSION 5 ADVANCED RECOGNITION TECHNIQUES

- 10995 OL **Robust detection and removal of dust artifacts in retinal images via dictionary learning and sparse-based inpainting** [10995-21]
- 10995 ON **Enhanced target recognition employing spatial correlation filters and affine scale invariant feature transform** [10995-23]
- 10995 OP **Optimization of the jamming signal parameters for conical-scan systems** [10995-25]
- 10995 OQ **Underwater image quality improvement approach based on an adapted Gabor multi-channels filtering** [10995-26]
- 10995 OR **Classroom engagement evaluation using computer vision techniques** [10995-31]

POSTER SESSION

- 10995 OS **Automated detection and classification for early stage lung cancer on CT images using deep learning** [10995-27]
- 10995 OT **A crowd counting method based on multi-column dilated convolutional neural network** [10995-28]
- 10995 OU **A Chinese acoustic model based on convolutional neural network** [10995-29]
- 10995 OV **Deep network based 3D hand keypoints prediction from single RGB images** [10995-30]
- 10995 OW **Generative adversarial networks based super resolution of satellite aircraft imagery** [10995-34]
