

PROCEEDINGS OF SPIE

Autonomous Air and Ground Sensing Systems for Agricultural Optimization and Phenotyping IV

**J. Alex Thomasson
Mac McKee
Robert J. Moorhead**
Editors

**15–16 April 2019
Baltimore, Maryland, United States**

Sponsored and Published by
SPIE

Volume 11008

Proceedings of SPIE 0277-786X, V. 11008

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Autonomous Air and Ground Sensing Systems for Agricultural Optimization and Phenotyping IV*, edited by J. Alex Thomasson, Mac McKee, Robert J. Moorhead, Proceedings of SPIE Vol. 11008 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

ADVANCED SENSORS FOR AGRICULTURE OPTIMIZATION AND PHENOTYPING

11008 02	Estimation of surface thermal emissivity in a vineyard for UAV microbolometer thermal cameras using NASA HyTES hyperspectral thermal, and Landsat and AggieAir optical data [11008-1]
11008 03	Estimation of crop latent heat flux from high resolution thermal imagery [11008-2]
11008 04	The impact of shadows on partitioning of radiometric temperature to canopy and soil temperature based on the contextual two-source energy balance model (TSEB-2T) (Best Paper Award) [11008-3]
11008 05	Impact of camera lens angle and sUAS flying altitude on spatial crop canopy temperature evaluation [11008-4]
11008 06	Comparing the effectiveness of hyperspectral and multispectral data in detecting citrus nitrogen and water stresses [11008-5]
11008 07	Using hyperspectral imagery to detect water stress in a vineyard [11008-6]
11008 08	Detection of diseases and pests on images captured in uncontrolled conditions from tea plantations [11008-33]

SYSTEMS FOR PRODUCING HIGH-QUALITY AGRICULTURAL REMOTE-SENSING DATA WITH SUAS

11008 09	Software requirements, architecture, design, and results of a modular, multispectral, scientific quality unmanned aerial system payload for civilian remote sensing [11008-8]
11008 0B	Coordination and control for automatic mobile ground control points in agricultural remote sensing [11008-10]
11008 0D	Small plot identification from video streams for high-throughput phenotyping of large breeding populations with unmanned aerial systems [11008-12]

CONTROL AND INTEGRATION OF UAS SENSING SYSTEMS FOR AGRICULTURAL OPTIMIZATION AND PHENOTYPING

11008 0E	UAV-based multi-sensor multi-platform integration for high throughput phenotyping [11008-13]
----------	-----------------------------------------------------------------------------------------------------

- 11008 OG **Drones coordination protocols in the precision agriculture context** [11008-15]
- 11008 OH **An energy aware smart station for an UAV fleet in the smart farming application** [11008-16]

ANALYTICS FOR UAV REMOTE SENSING IN AGRICULTURE

- 11008 OL **Validation of digital surface models (DSMs) retrieved from unmanned aerial vehicle (UAV) point clouds using geometrical information from shadows** [11008-19]
- 11008 OM **Assessment of different image enhancement and classification techniques in detection of volunteer cotton using UAV remote sensing** [11008-20]
- 11008 ON **Plant-by-plant level classifications of cotton root rot by UAV remote sensing** [11008-21]
- 11008 OO **Unmanned aerial system based tomato yield estimation using machine learning** [11008-22]
- 11008 OP **UAS based Tomato Yellow Leaf Curl Virus (TYLCV) disease detection system** [11008-23]
- 11008 OQ **Machine learning models for predicting lettuce health using UAV imageries** [11008-24]
- 11008 OR **Machine learning approaches to automate weed detection by UAV based sensors** [11008-25]
- 11008 OS **Estimation of soil moisture at different soil levels using machine learning techniques and unmanned aerial vehicle (UAV) multispectral imagery** [11008-26]

UAV AND GROUND-BASED SENSING APPLICATIONS FOR AGRICULTURAL OPTIMIZATION AND PHENOTYPING

- 11008 OU **Improving soybean breeding using UAS measurements of physiological maturity** [11008-27]
- 11008 OX **Use of unmanned aerial vehicle extracted data to predict health and tiller count in wheat** [11008-30]
- 11008 OY **Plant density estimation and weeds mapping on row crops at emergence using low altitude UAS imagery** [11008-31]
- 11008 OZ **Estimating standing biomass of exotic macrophytes using sUAS** [11008-32]
- 11008 11 **An initial analysis of real-time sUAS-based detection of grapevine water status in the Finger Lakes wine country of upstate New York (Best Paper Award)** [11008-35]
- 11008 12 **Application of unmanned aerial system for management of tomato cropping system** [11008-36]
