Volume 11038

Proceedings of SPIE 0277-786X, V. 11038

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *X-Ray Free-Electron Lasers: Advances in Source Development and Instrumentation V*, edited by Thomas Tschentscher, Luc Patthey, Kai Tiedtke, Marco Zangrando, Proceedings of SPIE Vol. 11038 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$18.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

FACILITY REPORTS, STATUS UPDATES AND FEL SCHEMES I

11038 03	Higher order modes at FELs: a machine interpretation [11038-5]
----------	---

X-RAY OPTICS AND WAVEFRONT DIAGNOSTICS I

11038 0L	Nanofocus characterization at the Coherent X-ray Imaging instrument using 2D single grating interferometry (Invited Paper) [11038-19]
----------	--

X-RAY OPTICS AND WAVEFRONT DIAGNOSTICS II

11038 0M	Transition metal coatings for reflection polarimeters in the 50-100 eV region [11038-22]
----------	---

TIME-DOMAIN DIAGNOSTICS AND FEL INSTRUMENTATION

11038 0Q	First x-ray test of the Icarus nanosecond-gated camera [11038-27]
11038 0R	Laser power meters as portable x-ray power monitors [11038-28]
11038 0S	Generation of ultrathin free-flowing liquid sheets [11038-29]

POSTER SESSION

11038 0W	Comparison between classical and off-plane diffraction efficiency for the soft x-ray region [11038-30]
11038 0X	Simple generation of two-color FEL pulses using a sextupole magnet [11038-31]
