Volume 11061

Proceedings of SPIE 0277-786X, V. 11061

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Automated Visual Inspection and Machine Vision III*, edited by Jürgen Beyerer, Fernando Puente León, Proceedings of SPIE Vol. 11061 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 IMAGE ACQUISITION

11061 02 **A simulation framework for the design and evaluation of computational cameras** [11061-1]

11061 03 **Robust phase unwrapping based on non-coprime fringe pattern periods for deflectometry measurements** [11061-2]

11061 04 **Coded aperture imaging of high-energy radiation: modeling and primary experimental research** [11061-3]

SESSION 2 INSPECTION, MEASUREMENT, AND CONTROL

11061 05 **An advanced method for matching partial 3D point clouds to free-form CAD models for in-situ inspection and repair** [11061-5]

11061 06 **Optical inspection of noncooperative copper surface structures using multi- and hyperspectral acquisition systems** [11061-6]

POSTER SESSION

11061 08 **Region of interest detection based on visual saliency analysis and iteratively clustering for remote sensing images** [11061-8]

11061 09 **Region proposal-based semantic matcher** [11061-9]

11061 0A **Image filtering using morphological thickness map** [11061-10]

11061 0B **Applying computer simulation using optical design software to multi-spectral geometrical calibration of stereoscopic measurement systems** [11061-11]

11061 0E **Automatic detection of welding defects using the convolutional neural network** [11061-14]

11061 0F **Analysis of filtering algorithms and searching for objects on the video image during the "Morris water maze" and "open field" experiments** [11061-15]

11061 0G **Detection and compensation of systematic errors in a null-screen corneal topographer with artificial intelligence** [11061-16]

11061 0H **Nonwoven fabric crease defects detection based on Gabor filter** [11061-17]

11061 0J **Machine vision application to analyze the quality of meat products by color characteristics** [11061-19]

11061 0K **A study of the influence of the orientation and arrangement features of wheat grains and their color on determination of the vitreousity** [11061-20]

11061 0L **Quantitative assessment of the precious stones color by machine vision** [11061-21]

11061 0M **Machine vision usage for new sausage products development** [11061-22]
