**Volume 11084**

Proceedings of SPIE 0277-786X, V. 11084

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIEDigitalLibrary.org](http://SPIEDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Physical Chemistry of Semiconductor Materials and Interfaces XVIII*, edited by Christian Nielsen, Daniel Congreve, Hugo A. Bronstein, Felix Deschler, Proceedings of SPIE Vol. 11084 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Authors*  
vii *Conference Committee*

---

## OPTO-ELECTRONIC DEVICES

---

11084 02 **Carrier dynamics in small-gap mercury chalcogenide colloidal quantum dots** [11084-1]

---

## ENERGY CONVERSION AND STORAGE

---

11084 0A **Influence of micelle charge density on adsorption and exciton delocalization of conjugated polyelectrolytes (Invited Paper)** [11084-8]

---

## NEW MATERIALS AND DIRECTIONS

---

11084 0E **Evaluation of the role that photoacid excited-state acidity has on photovoltage and photocurrent of dye-sensitized ion-exchange membranes (Invited Paper)** [11084-12]

---

## METAL HALIDE PEROVSKITE PHYSICS AND APPLICATIONS I

---

11084 0F **Hot-carrier cooling in lead-bromide perovskite materials** [11084-13]

11084 0G **Ultrafast photophysics of metal halide perovskite multiple quantum wells: device implications and reconciling band alignment (Invited Paper)** [11084-14]

---

## METAL HALIDE PEROVSKITE PHYSICS AND APPLICATIONS II

---

11084 0J **Single-source flash sublimation of metal-halide semiconductors (Invited Paper)** [11084-17]

11084 0L **Ultrafast dynamics in QD based photoelectrochemical cells (Invited Paper)** [11084-19]

---

## ORGANIC SEMICONDUCTORS: ELECTRONIC PROPERTIES AND DEVICES

---

11084 0N **Effect of local environment on aggregate electronic properties of P3HT** [11084-21]

11084 0Q     **Design principles for efficient singlet fission in anthracene-based organic semiconductors**  
[11084-24]
