

PROCEEDINGS OF SPIE

***Novel Optical Systems, Methods,
and Applications XXII***

**Cornelius F. Hahlweg
Joseph R. Mulley**
Editors

**13–14 August 2019
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 11105

Proceedings of SPIE 0277-786X, V. 11105

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Novel Optical Systems, Methods, and Applications XXII*, edited by Cornelius F. Hahlweg, Joseph R. Mulley, Proceedings of SPIE Vol. 11105 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

LIBRARY**

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

SESSION 1 NOVEL OPTICAL INSTRUMENTATION AND METHODS

11105 02	Novel UV line beam system for large area processing with 248 nm [11105-1]
11105 03	Visualization of dynamic stress conditions in elastic solids utilizing high frequency stroboscopic LED arrays [11105-3]
11105 04	Simultaneous reconstruction of the initial pressure and sound speed in photoacoustic tomography using a deep-learning approach [11105-4]

SESSION 2 NOVEL OPTICAL DESIGN, OPTIMIZATION, AND MODELLING I

11105 06	Fast and comfortable GPU-accelerated wave-optical simulation for imaging properties and design of highly aspheric 3D-printed freeform microlens systems (Invited Paper) [11105-6]
11105 07	Performance enhancement of noisy distributed acoustic sensor using normalized differential method [11105-7]
11105 08	Deep neural network (DNN) surrogate models for the accelerated design of optical devices and systems: moving beyond fully-connected feed forward architectures (Invited Paper) [11105-8]
11105 09	Effects of individual particulates in optical systems using a spatially isolated contamination scattering method [11105-9]

SESSION 3 NOVEL OPTICAL DESIGN, OPTIMIZATION, AND MODELLING II

11105 0A	General formula to design freeform collimator lens free of spherical aberration and astigmatism [11105-10]
11105 0B	Automated design of optical architectures using novel encoding methods and a multi-objective optimization framework (Invited Paper) [11105-11]
11105 0C	Aplanatic afocal system using two GRIN lenses with spherical surfaces [11105-12]

- 11105 0D **Software-defined laser ultrasonics: non-destructive testing** [11105-57]
- 11105 0E **Rendering light fields for optical system simulation (Invited Paper)** [11105-13]

SESSION 4 HYPERPECTRAL, THERMAL, AND POLARIZATION APPLICATIONS

- 11105 0K **Design of two-focus infrared system with lens-combined modulated wavefront coding technology** [11105-19]

SESSION 5 BIOMEDICAL APPLICATIONS

- 11105 0N **Sensitive multi-photon nonlinear laser wave-mixing detection of cancer and heart failure biomarkers** [11105-22]
- 11105 0O **Towards a super-resolution structured illumination microscope based on an array of nanoLEDs** [11105-23]
- 11105 0P **Hybrid optical prototype for sepsis bedside diagnostics** [11105-24]

SESSION 6 PHOTONICS I

- 11105 0R **Implementation of Mach Zehnder modulator based all optical gates** [11105-27]
- 11105 0T **Computing complex dispersive refractive indices from thin film optical properties of materials** [11105-29]

SESSION 7 PHOTONICS II

- 11105 0V **Broadband SiN directional coupler at 850nm for optical coherence tomography** [11105-31]
- 11105 0W **High-extinction chip-scale shuttering for quantum technologies** [11105-32]

POSTER SESSION

- 11105 0Z **General formula of the refractive telescope design free spherical aberration** [11105-35]
- 11105 10 **Novel microstructures on indium tin oxide for liquid crystal adaptive lenses** [11105-36]
- 11105 11 **Smart optical interaction simultaneously integrated with optical touch and fingerprint sensing** [11105-37]

- 11105 14 **Depth of field extension through polarization aberrations [11105-40]**
- 11105 15 **Spectral and selective laser autofluorescent microscopy of blood films [11105-41]**
- 11105 17 **Azimuthal fractalography networks of biological crystals [11105-43]**
- 11105 18 **Fractal analysis of patterns for birefringence biological tissues in the diagnostics of pathological and necrotic states [11105-44]**
- 11105 19 **Stokes-correlometry of polycrystalline films of biological fluids in the early diagnostics of system pathologies [11105-45]**
- 11105 1A **Analytical modeling of polarization transformation of laser radiation of various spectral ranges by birefringent structures [11105-46]**
- 11105 1C **RGB optoelectronic device determines the refractive index in liquid solutions [11105-48]**
- 11105 1D **Modeling three-dimensional transmission of a NOLM in continuous-wave and pulsed regimes for optical communications [11105-49]**
- 11105 1E **Design of a laser guide star for applications to adaptive optics [11105-50]**
- 11105 1F **Automated data acquisition system for the study of the characteristics of temporal-spectral evolution in a F8L [11105-51]**
- 11105 1H **Maksutov-Cassegrain inspired high object-space resolution lens for smartphone iris imaging [11105-53]**
- 11105 1I **The influence of phase mask position upon wavefront coded system: doublet imaging system [11105-54]**
- 11105 1J **Effects of light intensity on disparity for depth extraction in monochrome CMOS image sensor with offset pixel apertures [11105-55]**
