Volume 11106

Proceedings of SPIE 0277-786X, V. 11106

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Zoom Lenses VI*, edited by Takanori Yamanashi, Aurelian Dodoc, Proceedings of SPIE Vol. 11106 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 THEORY AND ANALYSIS

11106 02 **Zoom lens design via numerical methods (Invited Paper)** [11106-1]

11106 03 **Anamorphic prime and zoom lenses (Invited Paper)** [11106-2]

11106 04 **Aberrations of zoom lens kernel** [11106-3]

11106 05 **Determining optimal first-order focal lengths of zoom lenses through Monte Carlo simulations** [11106-4]

11106 06 **Assessing zoom lenses for manufacturability and tolerancing** [11106-5]

SESSION 2 APPLICATIONS I: MICROSCOPE

11106 07 **Afocal zoom lenses for stereo surgical microscopes (Invited Paper)** [11106-6]

11106 08 **Development overview and practical applications in stereomicroscope with "Perfect Zoom System" (Invited Paper)** [11106-7]

SESSION 3 APPLICATIONS II: CAMERA

11106 09 **Optical technologies for extra-high zoom ratio UHDTV broadcast lens (Invited Paper)** [11106-8]

11106 0A **Designing astigmatism-corrected zoom lenses for digital consumer imaging** [11106-9]

11106 0B **Comparing optical design complexity of high zoom ratio lenses within the VIS, SWIR, and LWIR** [11106-10]

SESSION 4 APPLICATIONS AND TESTING

11106 0D **Optical design of a smartphone zoom lens (Invited Paper)** [11106-12]

11106 0E **Design of telephoto zoom lens with built-in teleconverter for digital still cameras (Invited Paper)** [11106-13]
