Volume 11107

Proceedings of SPIE 0277-786X, V. 11107

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser Beam Shaping XIX*, edited by Angela Dudley, Alexander V. Laskin, Proceedings of SPIE Vol. 11107 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

SESSION 1 VORTEX AND VECTOR BEAMS

11107 03	Beam quality measurement through off-axis optical vortex [11107-2]
11107 04	A random fiber laser with cylindrical vector beams emission [11107-3]
11107 05	Generation of partially coherent Ince-Gaussian beams [11107-4]
11107 06	Nonmechanical beam-steering in reflective inverse diffusion [11107-5]

SESSION 2 BESSEL BEAMS

11107 07	Tuning Bessel beam propagation properties with liquid media [11107-6]
11107 09	Generation of asymmetrical Bessel-like laser beams for glass dicing [11107-8]
11107 0A	Implementation of a turret-mounted optical assembly for femtosecond laser Bessel-beam shaping for machining applications [11107-9]

SESSION 3 DEFORMABLE MIRRORS AND DIGITAL MICRO-MIRRORS

11107 0C	A MEMS mirror driver ASIC for beam-steering in scanning MEMS-based LiDAR [11107-11]
11107 0D	Research on the characteristics, mechanism, and compensation method of the temperature-induced surface distortion of deformable mirrors [11107-12]
11107 0G	Research on the surface shape testing and close-loop performance of a deflectometry system [11107-15]

SESSION 4 INDUSTRIAL APPLICATIONS AND MATERIAL PROCESSING

11107 0H	Laser beam shaping with computer-generated holograms for fiducial marking [11107-16]
----------	---

- 11107 0I **Comparing flat-top and Gaussian femtosecond laser ablation of silicon at normal and oblique angles of incidence** [11107-17]
- 11107 0J **Variable beam high power fiber laser with optimized beam characteristics for metal cutting** [11107-18]
- 11107 0K **High-precision ultrashort pulsed laser drilling of micro and nano holes using multibeam processing** [11107-19]
- 11107 0L **The next level: high-speed controlled conformal coating processes and topology measurements (Invited Paper)** [11107-20]
- 11107 0M **Dual-pulse pump laser for trace gas detection** [11107-22]

SESSION 5 X-RAYS, PLASMAS, AND PHASE ARRAYS

- 11107 0N **Quantitative compressor easing for efficient coherent x-ray pulses (Invited Paper)** [11107-23]
- 11107 0O **Beam propagation simulation of large phased laser arrays** [11107-24]

POSTER SESSION

- 11107 0V **Amplification of higher-order Poincaré sphere beams** [11107-31]
