**Volume 11108**

Proceedings of SPIE 0277-786X, V. 11108

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advances in X-Ray/EUV Optics and Components XIV*, edited by Ali M. Khounsary, Shunji Goto, Christian Morawe, Proceedings of SPIE Vol. 11108 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

ISSN: 0277-786X  
ISSN: 1996-756X (electronic)

ISBN: 9781510629097  
ISBN: 9781510629103 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

---

## MIRRORS

11108 04	<b>An optical design of twin Wolter mirrors for focusing and imaging experiments with soft x-ray free electron lasers [11108-3]</b>
11108 06	<b>Development of 120-mm-long ellipsoidal mirror for soft x-ray microscopy [11108-5]</b>

---

## THIN FILMS AND MULTILAYERS

11108 07	<b>Differential deposition for figure correction of x-ray mirrors [11108-6]</b>
----------	---

---

## CRYSTALS

11108 0B	<b>Optimizing x-ray optics for modulating x-ray beams with MEMS devices [11108-9]</b>
11108 0E	<b>Focusing and energy dispersion properties of a cylindrically bent asymmetric Laue crystal [11108-12]</b>

---

## GRATINGS

11108 0J	<b>Spectrometers and monochromators for femtosecond soft x-ray sources [11108-17]</b>
11108 0K	<b>Revisited grating efficiency maps: predicting diffraction grating performance by use of image analysis programs [11108-18]</b>
11108 0N	<b>Precise control of the blaze angle of x-ray diffraction gratings via planarization and plasma etching [11108-21]</b>

---

#### CAPILLARIES AND REFRACTIVE OPTICS

---

- 11108 0P      **Forming an ultrathin and lightweight x-ray micropore optics into a single substrate** [11108-23]
- 11108 0Q      **Compton effect based on a secondary source of hard x-ray beams** [11108-24]

---

#### POSTER SESSION

---

- 11108 0U      **Hybrid method simulations of a soft x-ray beamline** [11108-29]
- 11108 0V      **Ultrathin and lightweight lobster eye optics formed into a single flat substrate** [11108-30]
- 11108 0W      **Lobster eye optics: position determination based on 1D optics with simple code mask**  
[11108-31]
- 11108 0Y      **X-ray multi-foil optical system for CubeSat demonstrator** [11108-34]
