SPIE

Volume 11110

Proceedings of SPIE 0277-786X, V. 11110

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advances in Laboratory-based X-Ray Sources, Optics, and Applications VII*, edited by Alex Murokh, Daniele Spiga, Proceedings of SPIE Vol. 11110 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

RELATIVISTIC SOURCES I

11110 03	A compact light source providing high-flux, quasi-monochromatic, tunable X-rays in the laboratory (Invited Paper) [11110-2]
11110 05	Status of compact inverse Compton sources in Italy: BriXS and STAR [11110-4]

RELATIVISTIC SOURCES II

11110 08	Evaluation and optimization of multimodal x-ray imaging techniques for inverse Compton x-ray sources [11110-7]
11110 0A	Plasma accelerator-based ultrabright x-ray beams from ultrabright electron beams [11110-9]

APPLICATIONS

11110 0J	K-edge subtraction imaging for angiography at a compact synchrotron source [11110-17]
11110 0K	Undulator radiation brightness calculations in the Sirepo GUI for SRW [11110-19]
