**Volume 11121**

Proceedings of SPIE 0277-786X, V. 11121

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *New Concepts in Solar and Thermal Radiation Conversion II*, edited by Jeremy N. Munday, Peter Bermel, Proceedings of SPIE Vol. 11121 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

- *Conference Committee*
- *Introduction*

---

## **THERMAL RADIATION FOR POWER GENERATION**

---

- 11121 04 **An innovative TPV device design based on narrow gap IV-VI semiconductor MQW structures [11121-3]**

---

## **RADIATIVE COOLING**

---

- 11121 07 **Accelerating vapor condensation with daytime radiative cooling (Invited Paper) [11121-6]**

---

## **NOVEL CONCEPTS FOR SOLAR POWER GENERATION**

---

- 11121 0A **Modeling visual appearance of nanocrystal-based luminescent solar concentrators (Invited Paper) [11121-9]**
- 11121 0B **Spectrum-splitting photovoltaic system using bifacial cells for high energy yield [11121-11]**

---

## **PHOTOVOLTAIC RELIABILITY**

---

- 11121 0G **In situ durability of EVA polymer encapsulant with optical analysis techniques for photovoltaic conversion applications [11121-16]**
- 11121 0H **Optical and thermal properties of PVB encapsulant polymer functionalized by down-shift technique with new synthesized quantum dots for photovoltaic application [11121-17]**
