Volume 11123

Proceedings of SPIE 0277-786X, V. 11123

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photonic Fiber and Crystal Devices: Advances in Materials and Innovations in Device Applications XIII*, edited by Shizhuo Yin, Ruyan Guo, Proceedings of SPIE Vol. 11123 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

PHOTONIC CRYSTALS, FIBERS, AND THIN FILMS: MATERIALS AND PROPERTIES I

11123 02	Luminescent solar concentrators based on polymer nanocomposite films made by open-air pulsed laser deposition (Invited Paper) [11123-1]
11123 05	Ultra-sensitive and large dynamic range refractive index sensor utilizing annular core photonic crystal fiber [11123-5]

PHOTONIC CRYSTALS, FIBERS, AND THIN FILMS: MATERIALS AND PROPERTIES II

11123 07	Small-period titanium-diffused periodically poled lithium niobate waveguides for strongly nondegenerate quantum frequency conversion [11123-6]
----------	---

PHOTONIC CRYSTALS, FIBERS, AND THIN FILMS: MATERIALS AND PROPERTIES III

11123 09	Performance evaluation of a tunable filter using electro-optic material in metallo-dielectric structures (Invited Paper) [11123-10]
11123 0A	Force detection using whispering gallery mode-based micro-optical resonators [11123-11]

PHOTONIC CRYSTALS, FIBERS, AND THIN FILMS: DEVICES AND APPLICATIONS I

11123 0D	Lasing and supercontinuum generation in single-crystalline fibers (Invited Paper) [11123-14]
----------	---

PHOTONIC CRYSTALS, FIBERS, AND THIN FILMS: DEVICES AND APPLICATIONS II

11123 0H	A comparison of calibration methods for phase-only LCoS spatial light modulators [11123-19]
----------	--

PHOTONIC CRYSTALS, FIBERS, AND THIN FILMS: DEVICES AND APPLICATIONS III

11123 0M	The study of laser rangefinder with dual branch flexible light guide [11123-24]
----------	--

11123 ON **A smart unmanned aerial system for precision farming management** [11123-25]

POSTERS-MONDAY

11123 OP **Effect of relative lattice intensity of Lieb lattice on the propagation of out-of-phase octupole beam** [11123-28]

11123 OQ **Modeling of the refractive index profile of a femtosecond written waveguide in LiNbO₃** [11123-29]

11123 OR **Research on resonance of fiber nutation** [11123-31]

11123 OS **Quantum noise for the propagating solitons in an optical fiber in presence of the third order dispersion coefficient** [11123-33]

11123 OT **Deformation measurements using a stereo microscope** [11123-34]

11123 OU **Profile measurements using contrast-encoded pattern projections** [11123-35]

11123 OV **Fourier-transform profilometry using a pulse-encoded fringe pattern** [11123-36]

11123 OW **Mask optimization for 1D scanning projected fringe profilometry** [11123-37]

11123 OX **Smart laser weeding system** [11123-38]

11123 OY **In-situ characterization of multi-phase flows in a dynamic scraped surface heat exchanger using optical techniques in the visible spectrum** [11123-39]

11123 OZ **Achieving near-infrared deep tissue imaging via metal organic complex nanoparticles** [11123-40]

11123 IO **A multicomponent GAP-Se chalcogenide composition based rectangular photonic crystal fiber for coherent supercontinuum generation** [11123-41]
