Volume 11103

Proceedings of SPIE 0277-786X, V. 11103

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Optical Modeling and System Alignment*, edited by Mark A. Kahan, José Sasián, Richard N. Youngworth, Proceedings of SPIE Vol. 11103 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*

vii *Conference Committee*

ix *Introduction*

OPTICAL ALIGNMENT

11103 02 **Design for alignment** [11103-1]

11103 03 **Prism alignment using a point source microscope** [11103-2]

11103 04 **Lens centering using edge contact mounting** [11103-3]

11103 05 **Novel active alignment technique for measuring tilt errors in aspheric surfaces during optical assembly using Lens Alignment Station (LAS)** [11103-4]

11103 06 **Alignment and test of the Wide Field Infrared Survey Telescope (WFIRST) Engineering Design Unit (EDU) grism** [11103-5]

OPTICAL TOLERANCING AND VERIFICATION

11103 08 **Global Ecosystem Dynamics Investigation (GEDI) instrument alignment and test (Invited Paper)** [11103-7]

11103 09 **Specification of aspherical surfaces used as refractive elements in micro-optical systems** [11103-8]

11103 0A **Leveraging wafer-level manufacturing process limitations to increase large-scale fused silica microlens array uniformity** [11103-9]

11103 0B **Predictive tolerance bands for the correction-less assembly of optical systems** [11103-10]

OPTICAL DISTORTION, OPTOMECHANICS, AND THERMO-OPTICAL ENGINEERING

11103 0D **The in-situ long trace profiler window glass thermal deformation effect of measurement analysis** [11103-12]

11103 0E **Structural-Thermal-Optical-Performance (STOP) analysis for the prediction of the line-of-sight stability of JANUS camera on board JUICE ESA mission** [11103-13]

11103 0F **Dynamic analyses of the proposed habitable exoplanet astrophysics facility** [11103-14]

11103 0G **Multimodal image processing for characterizing high-temperature thermo-optical impact on imaging performance** [11103-15]

STRAY LIGHT

11103 0H **The stray-light entrance pupil concept and how it can be used to facilitate stray-light characterization** [11103-16]

11103 0I **Measuring bidirectional reflectance distribution of low reflectivity surfaces in the near infrared** [11103-17]

11103 0J **Innovative software simulation techniques to design specular curved baffle designs in ground- and space-based telescopes** [11103-31]

11103 0K **Determining optimal orientation of straight-vane baffles for stray light mitigation** [11103-18]

COMPONENT MODELS

11103 0L **Comparison of 3D finite-difference methods for modeling waveguide components embedded in a general optical system** [11103-19]

COMMUNICATION SYSTEMS AND SI PHOTONICS

11103 0O **The nonstandard finite-difference time-domain methodology for broadband calculations** [11103-22]

11103 0P **Photonic device sensitivity analysis methods: towards process variation-aware silicon photonics design** [11103-23]

11103 0Q **Adjoint-based particle defect yield modeling for silicon photonics** [11103-24]

POSTER SESSION

11103 0U **Distortion calculation and removal for an off-axis and wide angle camera** [11103-29]

11103 0V **Analysis and modeling of CLBG using the transfer matrix** [11103-30]

11103 0W **Chromatic focal shift of optical system expressed by related wavelength formulas** [11103-32]
