

PROCEEDINGS OF SPIE

CubeSats and SmallSats for Remote Sensing III

Thomas S. Pagano
Charles D. Norton
Sachidananda R. Babu
Editors

11–12 August 2019
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 11131

Proceedings of SPIE 0277-786X, V. 11131

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *CubeSats and SmallSats for Remote Sensing III*, edited by Thomas S. Pagano, Charles D. Norton, Sachidananda R. Babu, Proceedings of SPIE Vol. 11131 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

ISSN: 0277-786X

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

RECENT FLIGHT MISSIONS

11131 03	IceCube: spaceflight demonstration of 883-GHz cloud radiometer for future science [11131-2]
11131 05	Compact spectral irradiance monitor flight demonstration mission [11131-4]
11131 06	RainCube: How can a CubeSat radar see the structure of a storm? [11131-5]

CUBESAT AND NANOSAT INSTRUMENTS AND CONCEPTS I

11131 08	Lunar Ice Cube: ongoing development of first generation deep space CubeSat mission with compact broadband IR spectrometer [11131-7]
11131 09	Predicted performance for the NASA TROPICS CubeSat constellation mission for tropical cyclone studies [11131-8]
11131 0A	Assessing nanosatellite capabilities for accurate water-leaving radiance retrievals in coastal ocean waters: a forced aerosol model approach [11131-9]
11131 0B	Advances in the optical design of a spatial heterodyne interferometer deployed on a 6U-CubeSat for atmospheric research [11131-10]
11131 0C	In-orbit demonstration of artificial intelligence applied to hyperspectral and thermal sensing from space [11131-11]

CUBESAT AND NANOSAT INSTRUMENTS AND CONCEPTS II

11131 0D	Compact total irradiance monitor flight demonstration [11131-12]
11131 0F	CIRiS, a CubeSat-compatible, imaging radiometer for earth science and planetary missions [11131-14]
11131 0G	HYTI: thermal hyperspectral imaging from a CubeSat platform [11131-15]

11131 OH **Electronic alignment for the CubeSat infrared atmospheric sounder [11131-16]**

SMALLSAT INSTRUMENTS AND CONCEPTS

11131 OI **MISTiC winds: a micro-satellite constellation approach to high resolution observations of the atmosphere using infrared sounding and 3D winds measurements: a summary of risk reduction testing [11131-17]**

11131 OJ **Recycling GPS signals and radiation monitoring: the two payloads onboard PRETTY [11131-18]**

11131 OK **The GLO (GFCR Limb Occultation) sensor: a new sensor concept for upper troposphere and lower stratosphere (UTLS) composition and transport studies [11131-19]**

ENABLING TECHNOLOGIES AND TECHNIQUES

11131 OL **The effect of dimensionality reduction on signature based target detection for hyperspectral remote sensing [11131-20]**

POSTER SESSION

11131 OO **Interrogating the molecular composition of asteroids from a remote vantage: progress in the laboratory [11131-24]**

11131 OP **A CubeSat receiver for the study of VLF-waves at LEO [11131-25]**
