Volume 11169

Proceedings of SPIE 0277-786X, V. 11169

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Artificial Intelligence and Machine Learning in Defense Applications*, edited by Judith Dijk, Proceedings of SPIE Vol. 11169 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

ISBN: 9781510630413
ISBN: 9781510630420 (electronic)

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

AI IN INTELLIGENCE, SURVEILLANCE, AND RECONNAISSANCE (JOINT SESSION 5)

11169 02	Real-time CNN-based object detection and classification for outdoor surveillance images: daytime and thermal (Invited Paper) [11169-1]
11169 03	A deep neural network model for hazard classification [11169-3]
11169 04	Edge vs. cloud computing: where to do image processing for surveillance? [11169-28]

OBJECT DETECTION (JOINT SESSION 6)

11169 05	Spatiotemporal detection of maritime targets using neural networks [11169-4]
11169 06	Ship detection in synthetic aperture radar (SAR) images by deep learning [11169-29]
11169 07	Multi-modal object detection using unsupervised transfer learning and adaptation techniques (Best Student Paper Award) [11169-5]
11169 08	Detecting and classifying small objects in thermal imagery using a deep neural network [11169-6]
11169 09	Detecting unseen targets during inference in infrared imaging [11169-7]

SEGMENTATION (JOINT SESSION 7)

11169 0A	See clearer at night: towards robust nighttime semantic segmentation through day-night image conversion [11169-8]
11169 0B	Semantic segmentation of panoramic images using a synthetic dataset [11169-9]
11169 0C	A comparative study of high-recall real-time semantic segmentation based on swift factorized network [11169-10]

AI FOR DEFENCE APPLICATIONS

- 11169 OE **Applicability of AI methods to JISR resource planning [11169-12]**
- 11169 OF **Drone localization and identification using an acoustic array and supervised learning [11169-13]**
- 11169 OG **Towards information extraction and semantic world modelling to support information management and intelligence creation in defense coalitions [11169-14]**
- 11169 OH **Transparent object sensing with enhanced prior from deep convolutional neural network [11169-15]**

IMAGE ENHANCEMENT, FUSION, AND BACKGROUNDS

- 11169 OJ **Deep learning for software-based turbulence mitigation in long-range imaging (Invited Paper) [11169-16]**
- 11169 OK **Adversarial camouflage for naval vessels [11169-17]**
- 11169 OL **On the robustness of compressive sensing hyperspectral image reconstruction using convolutional neural network [11169-18]**
- 11169 OM **Analysis of different background subtraction methods applied on drone imagery under various weather conditions in the UAE region [11169-19]**
- 11169 ON **A novel approach for spectrum decomposition for Raman spectroscopy [11169-20]**
- 11169 OO **Object-based multispectral image fusion method using deep learning [11169-21]**

POSTER SESSION

- 11169 OP **The challenges and some thinking for the intelligentization of precision guidance ATR [11169-22]**
- 11169 OQ **Semantic scene understanding on mobile device with illumination invariance for the visually impaired [11169-23]**
- 11169 OS **Rain and snow removal using multi-guided filter and anisotropic gradient in the quaternion framework [11169-26]**
- 11169 OU **Analysis of the controllers of the vessel's course control systems in difficult conditions of navigation [11169-31]**
