

PROCEEDINGS OF SPIE

Polarization Science and Remote Sensing IX

**Julia M. Craven
Joseph A. Shaw
Frans Snik**
Editors

**14–15 August 2019
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 11132

Proceedings of SPIE 0277-786X, V. 11132

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Polarization Science and Remote Sensing IX*, edited by Julia M. Craven, Joseph A. Shaw, Frans Snik, Proceedings of SPIE Vol. 11132 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>

POLARIZATION IN REMOTE SENSING I

11132 03	Material identification from remote sensing of polarized self-emission [11132-3]
11132 04	Simultaneous determination of 3-dimensional velocity components using a single vector beam [11132-4]
11132 05	Polarization to estimate leaf surface reflectance [11132-5]
11132 06	Polarization enhancement of passive SWIR cloud thermodynamic phase remote sensing [11132-6]

POLARIZATION IN REMOTE SENSING II

11132 08	Expected performance and error analysis for SPEXone, a multi-angle channeled spectropolarimeter for the NASA PACE mission (Invited Paper) [11132-8]
11132 09	Achieving a spectropolarimetric precision better than 0.1% in the near-infrared with WIRC+Pol [11132-9]
11132 0A	A snapshot full-Stokes spectropolarimeter for detecting life on Earth [11132-10]
11132 0B	NEOPol: Polish polarimeter for NEO observations [11132-11]

POLARIZATION PHENOMENOLOGY OF NATURAL AND ARTIFICIAL SCENES

11132 0C	Temporal evolution of sky polarization during solar eclipse totality [11132-12]
11132 0E	The rainbow beam experiment: direct visualization of dipole scattering and optical rotatory dispersion [11132-14]

POLARIZATION METROLOGY AND INSTRUMENTATION I

11132 0H	Practical design issues for snapshot Mueller matrix spectropolarimetry [11132-17]
----------	--

- 11132 OI **Improving performance of PEM-based partial Mueller matrix polarimeters** [11132-18]
- 11132 OJ **Measurement of scattered light polarization on surfaces using focused illumination** [11132-19]
- 11132 OK **Spatio-temporal hybrid color-polarization channeled sensors** [11132-21]

POLARIZATION METROLOGY AND INSTRUMENTATION II

- 11132 OL **The power of polymers and liquid crystals for polarization control (Invited Paper)** [11132-22]
- 11132 OM **Performance assessment of microgrid polarization cameras** [11132-23]
- 11132 ON **Phase-shifting interferometry in fiber-based channeled spectropolarimetry** [11132-24]
- 11132 OO **Estimation of the correlation distance of one-dimensional random rough surfaces from polarization sensitive bistatic measurements** [11132-25]

POLARIZATION METROLOGY AND INSTRUMENTATION III

- 11132 OP **Dynamic calibration of a channeled spectropolarimeter for extended temperature stability** [11132-26]
- 11132 OQ **Simulation of the polarimetric response of microscopic semitransparent specimens immersed in water** [11132-27]

POLARIZATION OPTICAL SYSTEMS AND COMPONENTS

- 11132 OU **Oblique incidence performance of achromatic retarders in polarization optics** [11132-31]
- 11132 OV **Direct correlation spectrometer using polarized light** [11132-32]
- 11132 OX **Polarization-dependent diffractive optical elements based on photoalignment of liquid crystals** [11132-34]

POSTER SESSION

- 11132 OZ **Classification of polarimetric SAR data based on subspace projection segmentation** [11132-36]
- 11132 IO **Improved speckle filtering of polarimetric SAR by target signature preserving** [11132-37]
- 11132 I3 **Retardance parameters measurements by employing a rotating polarizer-analyzer polarimeter** [11132-40]

- 11132 14 **Differentiation of collagenous changes in scleroderma from unstained thin skin tissue sections using Mueller polarimetric image analysis [11132-41]**
- 11132 15 **Improvement of Lidar data classification algorithm using the machine learning technique [11132-42]**
