Volume 11151

Proceedings of SPIE 0277-786X, V. 11151

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Sensors, Systems, and Next-Generation Satellites XXIII*, edited by Steven P. Neeck, Philippe Martimort, Toshiyoshi Kimura, Proceedings of SPIE Vol. 11151 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

xiii	<i>Conference Committee</i>

JAPANESE MISSIONS

11151 03	Results of the commissioning phase of the mission instruments on GOSAT-2 [11151-2]
11151 04	Evaluating degradations of TANSO-FTS/GOSAT using principal component analysis [11151-3]
11151 05	ALOS-4 current status [11151-4]
11151 06	Development status of MOLI (Multi-footprint Observation lidar and Imager) [11151-5]
11151 07	Annual solar and LED calibration results and lessons learned of GCOM-C/SGLI-VNR [11151-6]

US MISSIONS I

11151 09	Orbiting Carbon Observatory-3 (OCO-3), remote sensing from the International Space Station (ISS) [11151-8]
11151 0B	TEMPO Green Paper: chemistry, physics, and meteorology experiments with the tropospheric emissions: monitoring of pollution instrument [11151-10]

US MISSIONS II

11151 0C	ICESat-2 mission overview and early performance (Invited Paper) [11151-11]
11151 0G	The NASA Plankton, Aerosol, Cloud, ocean Ecosystem (PACE) mission: an emerging era of global, hyperspectral Earth system remote sensing [11151-15]

US MISSIONS III

11151 0K	Fully-polarimetric millimeter-wave spectrometers for measurement of Earth's magnetic field [11151-19]
----------	--

EUROPEAN MISSIONS I

- 11151 0P **Sentinel-2C instrument new features and first instrument performance characterization**
[11151-25]
- 11151 0Q **Design and first light of the Sentinel-5 UV1 spectrometer optics** [11151-26]
- 11151 0S **Technological innovation for the ALTIUS atmospheric limb sounding mission** [11151-28]
- 11151 0T **Technology developments and status of hyperspectral instruments at the European Space Agency** [11151-29]

EUROPEAN MISSIONS II

- 11151 0U **Manufacturing method for monolithic freeform Offner-gratings for hyper-spectral imaging**
[11151-30]
- 11151 0W **System and technology studies for the Next-Generation Gravity mission** [11151-32]
- 11151 0X **The Arctic and Nordic Imager as sensor concept for optical imaging in highly elliptical orbits with applications to polar meteorology** [11151-33]
- 11151 0Y **RAAD: a CubeSat-based soft gamma ray detector for the study of terrestrial gamma ray flashes and other short timescale phenomena** [11151-34]

FPA

- 11151 11 **T2SL development for space at IRnova: from eSWIR to VLWIR** [11151-37]
- 11151 13 **Development of high-performance detector technology for UV and IR applications** [11151-39]

MISSIONS AND SENSING I

- 11151 16 **An on-orbit infrared inter-calibration reference standard for decadal climate trending of the Earth** [11151-42]
- 11151 17 **Current status of the MTG-FCI AMV prototype** [11151-43]
- 11151 18 **Detection and identification of buried target objects based on multi-angle bi-static ground penetrating rader experiment with synthetic aperture radar technique** [11151-44]
- 11151 19 **Introduction to Formosat-8 remote sensing satellite program** [11151-45]

CALIBRATION I

- 11151 1B **Calibration and characterization of the EnMAP hyperspectral imager** [11151-47]
- 11151 1D **Simulating response versus scan angle characterization on OCI for the upcoming PACE mission** [11151-49]
- 11151 1E **The bidirectional reflectance of black silicon used in space and Earth remote sensing applications** [11151-50]
- 11151 1F **Landsat 9 pre-launch sensor characterization and comparison with Landsat 8 results** [11151-51]

CALIBRATION II

- 11151 1H **Response versus scan angle derived from polarization testing for JPSS-2 VIIRS** [11151-53]
- 11151 1I **SNPP VIIRS reflective solar bands on-orbit calibration seven-year update: extension and improvements** [11151-54]
- 11151 1J **NOAA-20 VIIRS reflective solar bands on-orbit calibration** [11151-55]
- 11151 1L **NOAA-20 VIIRS solar diffuser BRDF on-orbit change factor for wavelengths longer than 1 μm** [11151-57]

CALIBRATION III

- 11151 1M **Using solar eclipse events to validate VIIRS reflective solar band calibration at multiple radiance levels** [11151-58]
- 11151 1N **In-orbit lunar imaging and analysis for optical remote sensing satellite** [11151-59]
- 11151 1O **Validation of CERES flight model 5 in-orbit calibrations using lunar observations** [11151-60]
- 11151 1P **VIIRS reflective solar bands on-orbit calibration using the Moon** [11151-61]
- 11151 1Q **Using the moon and stars for VIIRS day/night band on-orbit calibration** [11151-62]

CALIBRATION IV

- 11151 1S **An attempt to perform inter-band calibration validation for Sentinel-2 using snowy sites such as Dome C in Antarctica** [11151-64]

- 11151 1T **An automated algorithm to detect MODIS, VIIRS and GEO sensor L1B radiance anomalies** [11151-65]
- 11151 1U **Assessment of VIIRS on-orbit polarization sensitivity and its impact on CLARREO Pathfinder inter-calibration** [11151-66]
- 11151 1W **Calibration plan for the Ocean Color Instrument (OCI) engineering test unit** [11151-91]

MISSIONS AND SENSING II

- 11151 1X **ESA's Earthnet Data Assessment Pilot: paving the way for new space players** [11151-68]
- 11151 1Z **Design and development of a low-cost multispectral imager for data fusion with hyperspectral imagers (Best Student Paper Award)** [11151-70]
- 11151 20 **The smart Landsat project** [11151-71]

POSTER SESSION

- 11151 22 **Optomechanical choppers with conical shafts: a finite element analysis** [11151-74]
- 11151 23 **Light source for stray light characterisation of EnMAP spectrometers** [11151-75]
- 11151 24 **Improvements in the on-orbit response versus scan-angle characterization for the MODIS ocean color bands** [11151-76]
- 11151 25 **Evaluation of NOAA-20 VIIRS reflective solar bands calibration performance using vicarious approaches** [11151-77]
- 11151 27 **Design of miniaturization hyperspectral imager based on CMOS sensor** [11151-79]
- 11151 29 **Compact Dyson imaging spectrometer with large working distance using freeform surface** [11151-81]
- 11151 2B **On-orbit tracking of sub-sample gain differences in SNPP and NOAA-20 VIIRS imagery bands** [11151-83]
- 11151 2D **A framework for geometric quality evaluation and enhancement of Alsat-2A satellite imagery** [11151-85]
- 11151 2E **Airborne hyperspectral trace gas sensors as testbeds for geostationary air quality missions** [11151-86]
- 11151 2F **Surveying the effect of thermal and mechanical loads on star sensor baffle and its performance** [11151-87]

11151 2G **A new concept of multifunctional satellite system for the rapid event response** [11151-88]

11151 2H **Analysis for observation angle of the Earth two-polar regions from Moon-based platform**
[11151-89]
