**Volume 11182**

Proceedings of SPIE 0277-786X, V. 11182

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Semiconductor Lasers and Applications IX*, edited by Ning Hua Zhu, Werner H. Hofmann, Jian-Jun He, Proceedings of SPIE Vol. 11182 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii	Authors
ix	Symposium Committees
xiii	Conference Committee

---

## SESSION 1 INTEGRATED OPTOELECTRONIC DEVICES I

---

11182 02	Electro-absorption modulated tunable V-cavity laser (Invited Paper) [11182-1]
11182 04	Design and simulation of an anti-symmetric Bragg grating silicon modulator [11182-3]

---

## SESSION 2 INTEGRATED OPTOELECTRONIC DEVICES II

---

11182 06	Silicon-plus photonic devices for on-chip light-manipulation and photodetection (Invited Paper) [11182-5]
11182 07	1550nm monolithic MOPA diode laser for lidar applications [11182-6]
11182 08	Optically-pumped InAs/GaAs quantum-dot microdisk lasers monolithically grown on on-axis Si (001) substrate [11182-7]

---

## SESSION 3 SUBSYSTEMS USING LASER DIODES

---

11182 0A	Phase shifter and phase response of PD in phased-array antennas (Invited Paper) [11182-9]
11182 0B	Photonic generation and transmission of phase-modulated microwave signals (Invited Paper) [11182-10]
11182 0C	Development of a 780nm narrow line width semiconductor laser device [11182-11]

---

## SESSION 4 APPLICATIONS OF LASER DIODES I

---

11182 0F	High-power low-smile vertically-stacked laser diode based on microchannel cooling [11182-14]
11182 0G	Realization of beam shaping using VCSEL incorporating a high-contrast subwavelength grating [11182-19]

---

**SESSION 5      APPLICATIONS OF LASER DIODES II**

---

11182 0I      **3D NIR laser night vision based on gated range-intensity correlation imaging (Invited Paper)**  
[11182-17]

---

**SESSION 6      SEMICONDUCTOR LASERS**

---

11182 0K      **Self-recirculating modulation-enhanced optical frequency comb generation pumped by optical injection (Invited Paper)** [11182-20]

11182 0L      **Performance of high-power diode lasers operated at cryogenic temperature** [11182-21]

11182 0M      **On-chip optical narrowband reflector based on anti-symmetric Bragg grating** [11182-22]

11182 0N      **Narrow linewidth parallel hybrid-integrated optical injection locking DFB laser** [11182-23]

---

**SESSION 7      VCSELS I**

---

11182 0O      **Design of 940-nm VCSEL with metastructure (Invited Paper)** [11182-24]

11182 0P      **100 Gb/s VCSEL based optical interconnects enabled by multimode full-link optimization (Invited Paper)** [11182-25]

---

**SESSION 8      VCSELS II**

---

11182 0R      **Investigation of thermal performance of small oxide-aperture vertical-cavity surface-emitting lasers (Invited Paper)** [11182-28]

---

**POSTER SESSION**

---

11182 0U      **Synchronized random bit generation based on vertical-cavity surface-emitting lasers with optical injection and polarization-rotated feedback** [11182-15]

11182 0V      **Monolithic integration of tunable V-coupled-cavity laser and Mach-Zehnder modulator on generic InP platform** [11182-31]

11182 0W      **High power 685nm laser diode array with 300W output power and 40% conversion efficiency**  
[11182-32]

11182 0X      **Multiple gas detection using v-cavity coupled diode laser** [11182-33]

- 11182 0Y      **Incoherent beam combination of mid-wave infrared quantum cascade lasers [11182-34]**
- 11182 0Z      **Blue laser diode light for underwater optical vision guidance in AUV docking [11182-35]**
- 11182 10      **Angular velocity measurement system based on optical frequency comb [11182-36]**
