

PROCEEDINGS OF SPIE

# ***Fourteenth School on Acousto-Optics and Applications***

**Ireneusz Grulkowski**  
**Bogumił B. J. Linde**  
**Marí Duocastella**  
*Editors*

**24–27 June 2019**  
**Torun, Poland**

*Organized by*  
Nicolaus Copernicus University in Toruń (Poland)  
University of Gdańsk (Poland)  
Aleksander Jabłoński Foundation (Poland)

*Sponsored by*  
Polish Ministry of Science and Higher Education (Poland)  
University of Gdańsk (Poland)  
The Optical Society (United States)  
International Commission on Acoustics (United States)

*Published by*  
SPIE

**Volume 11210**

Proceedings of SPIE 0277-786X, V. 11210

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fourteenth School on Acousto-Optics and Applications*, edited by Ireneusz Grulkowski, Bogumił B. J. Linde, Martí Duocastella, Proceedings of SPIE Vol. 11210 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## FOURTEENTH SCHOOL ON ACOUSTO-OPTICS AND APPLICATIONS

---

11210 02	<b>Tribute to the memory of professor Vitaly Voloshinov [11210-32]</b>
11210 03	<b>Acousto-optics as a field of current interest in research and application [11210-19]</b>
11210 04	<b>Broadband immersion laser ultrasonic tomography of graphite-epoxy composite [11210-5]</b>
11210 05	<b>Interaction of two coherent light beams with ultrasonic wave [11210-7]</b>
11210 06	<b>Physical properties of <math>\alpha</math>-BaB<sub>2</sub>O<sub>4</sub> and <math>\beta</math>-BaB<sub>2</sub>O<sub>4</sub> crystals promising for applications in acousto-optic devices [11210-14]</b>
11210 07	<b>Multi-electrode array for spectral bandwidth control [11210-27]</b>
11210 08	<b>Acousto-optic programmable filters and the sampling theorem [11210-2]</b>
11210 09	<b>Effects of electric matching circuit parameters on the acousto-optic mode locker functioning [11210-21]</b>
11210 0A	<b>Adaptive change of AOTF instrumental function with frequency modulation of ultrasonic wave [11210-6]</b>
11210 0B	<b>Acousto-optical modulator based on NaBi(MoO<sub>4</sub>)<sub>2</sub> crystal [11210-30]</b>
11210 0C	<b>Photosynthetic energy storage efficiency in biofilms determined by photoacoustics [11210-16]</b>
11210 0D	<b>Endoscopic spectral imagers based on acousto-optic filtration of light [11210-24]</b>
11210 0E	<b>Anisotropic acousto-optic interaction in KRS-5 cubic crystal possessing induced optical anisotropy [11210-13]</b>
11210 0F	<b>Acousto-optic spectrometer ISEM for ExoMars-2020 space mission: ground measurements and calibrations [11210-9]</b>

11210 OG	<b>Applications of collinear acousto-optic diffraction for optical frequency combs generation</b> [11210-8]
11210 OH	<b>Semiautomatic acousto-optical tunable filter calibration from spectrometry in the visible range with deep learning</b> [11210-31]
11210 OI	<b>Sensitivity characterization of in-fiber acousto-optic interaction</b> [11210-26]
11210 OJ	<b>All-fiber dual-wavelength narrowband acousto-optic tunable bandpass filter based on vector mode coupling</b> [11210-3]
11210 OK	<b>Application of layered structures for mid-infrared acousto-optics</b> [11210-22]
11210 OL	<b>Anisotropic light diffraction in spatially periodical acoustic field</b> [11210-18]
11210 OM	<b>Analysis of wide-angle acousto-optic interaction geometry in single crystal mercury bromide</b> [11210-12]
11210 ON	<b>A novel configuration for effective acousto-optic diffraction by IDT-radiated bulk waves in lithium tantalate</b> [11210-20]
11210 OO	<b>Investigation of close to collinear anisotropic acousto-optic interaction in a biaxial crystal of alpha-iodic acid</b> [11210-29]
11210 OP	<b>Review of acousto-optical devices in advanced microscopy: from 3D scanning via super-resolution to encoded multi-beams</b> [11210-1]
11210 OQ	<b>High-frequency (<math>f_{RF} &gt; 1</math> GHz) acousto-optic modulation using a doubly resonant cavity in a MEMS foundry platform</b> [11210-28]
11210 OR	<b>Design, implementation, and characterization of a fast acousto-optical multi-focal laser system</b> [11210-23]
11210 OS	<b>New AOTF-based instrumental concepts for atmospheric science</b> [11210-25]
