

PROCEEDINGS OF SPIE

# ***Sixth Geoinformation Science Symposium***

**Sandy Budi Wibowo  
Andi B. Rimba  
Stuart Phinn  
Ammar A. Aziz**  
*Editors*

**26–27 August 2019  
Yogyakarta, Indonesia**

*Organized by*  
Universitas Gadjah Mada (Indonesia)

*Sponsored by*  
Indonesian Geographers Society  
PUSPICS, Universitas Gadjah Mada (Indonesia)

*Published by*  
SPIE

**Volume 11311**

Proceedings of SPIE 0277-786X, V. 11311

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Sixth Geoinformation Science Symposium*, edited by Sandy Budi Wibowo, Andi B. Rimba, Stuart Phinn, Ammar A. Aziz, Proceedings of SPIE Vol. 11311 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

ISSN: 0277-786X  
ISSN: 1996-756X (electronic)

ISBN: 9781510633896  
ISBN: 9781510633902 (electronic)

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

---

## REMOTE SENSING FOR VEGETATION

---

11311 02	<b>Multitemporal remote sensing data for classification of food crops plant phase using supervised random forest [11311-10]</b>
11311 03	<b>Seagrass species composition and above-ground carbon stock mapping in Parang Island using PlanetScope image [11311-42]</b>
11311 04	<b>Multitemporal analysis of vegetated land cover changes related to tin mining activity in Bangka Regency using Landsat imagery [11311-30]</b>

---

## GIS FOR SPATIAL MODELING I

---

11311 05	<b>Personalized safety route recommender application using integrated urban crime hotspot data [11311-15]</b>
11311 06	<b>The effect of spatial resolution on the performance of cellular automata-based land use change spatial simulation [11311-40]</b>

---

## CARTOGRAPHY AND GEOVISUALIZATION I

---

11311 07	<b>Age group influence for effectiveness study of color symbol scheme on choropleth map of population density in special region of Yogyakarta [11311-8]</b>
11311 08	<b>Visual analytics for railway network in Java Island [11311-24]</b>

---

## REMOTE SENSING OF ATMOSPHERE AND THERMAL

---

11311 09	<b>Distribution of land surface temperature in Yogyakarta urban area [11311-34]</b>
11311 0A	<b>Downscaling land surface temperature on multi-scale image for drought monitoring [11311-6]</b>

---

#### GIS FOR SPATIAL MODELING II

---

- 11311 0B **MaxEnt (Maximum Entropy) model for predicting prehistoric cave sites in Karst area of Gunung Sewu, Gunung Kidul, Yogyakarta** [11311-3]
- 11311 0C **Improving geoinformation technology by incorporating local participation** [11311-43]
- 11311 0D **Coastal water environment suitability studies for green mussel cultivation in Pasaran Island, Lampung Bay** [11311-26]

---

#### CARTOGRAPHY AND GEOVISUALIZATION II

---

- 11311 0F **Density analysis of Flickr data as a proxy to reveal the intensity of tourism activity in Borobudur** [11311-39]
- 11311 0G **GIS application for damaged buildings assessment and shelter distribution analysis after earthquake and tsunami in Palu 2018** [11311-28]
- 11311 0H **Thematic geo-visualization for social data representation in special region of Yogyakarta** [11311-13]
- 11311 0I **Visualized information value model result of landslide vulnerability in Purworejo** [11311-9]

---

#### DIGITAL ELEVATION MODEL TECHNOLOGY

---

- 11311 0J **DTM generation from aerial photo and Worldview-3 images by using different DSM filtering methods** [11311-16]
- 11311 0K **Performance evaluation of different DEMs for topographic correction on LAPAN-A3: preliminary results** [11311-1]
- 11311 0L **Correcting topographic effect on Landsat-8 images: an evaluation of using different DEMs in Indonesia** [11311-41]

---

#### UAV AND RS APPLICATION IN SOCIO-ECONOMIC ANALYSIS

---

- 11311 0M **Mangrove ecosystem data inventory using unmanned aerial vehicles (UAVs) in Yogyakarta coastal area** [11311-14]
- 11311 0N **The role of detail spatial data resulted from unmanned aerial vehicle for tourism area planning in Karst Area, Gunungkidul** [11311-20]

---

#### RS AND GIS FOR VEGETATION AND DROUGHT

---

- 11311 0O Delineation of groundwater potential zones using remote sensing, GIS, and AHP techniques in southern region of Banjarnegara, Central Java, Indonesia [11311-23]
- 11311 0P Performance of various speckle filter methods in modelling forest aboveground biomass using Sentinel-1 data: case study of Barru Regency, South Sulawesi [11311-38]
- 11311 0Q Suitable small farm reservoir development planning for drought disaster risk management of agricultural land using remote sensing and GIS [11311-29]

---

#### OBJECT BASED IMAGE ANALYSIS (OBIA) APPLICATION

---

- 11311 0R Image segmentation for vegetation types extraction using WorldView-2: a case study in parts of Dieng Plateau, Central Java [11311-2]
- 11311 0S Object based classification for land cover mapping using Sentinel-1A in Yogyakarta [11311-12]

---

#### RS AND GIS FOR LAND COVER MAPPING

---

- 11311 0T The effects of polynomial interpolation and resampling methods in geometric correction on the land-cover classification accuracy of Landsat-8 OLI imagery: a case study of Kulon Progo area, Yogyakarta [11311-21]
- 11311 0U Comparing land-cover maps accuracies generated from multispectral classification of Landsat-8 OLI dan Pleiades images using two different classification schemes [11311-31]
- 11311 0V Development of land-cover spatial database using satellite imagery: lesson learned from southern part of Sumatera [11311-32]
