Volume 11158

Proceedings of SPIE 0277-786X, V. 11158

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Target and Background Signatures V*, edited by Karin U. Stein, Ric Schleijsen, Proceedings of SPIE Vol. 11158 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SENSOR PROPERTIES AND TARGET DETECTION

- 11158 02 **Target detection performance of hyperspectral imagers (Invited Paper)** [11158-1]
11158 03 **A rapid dual-bands infrared detection method for aerial targets based on LCM** [11158-2]

UNDERSTANDING SCENES

- 11158 05 **Cloud detection and visibility estimation during night time using thermal camera images**
[11158-5]
11158 07 **A depth estimation framework based on unsupervised learning and cross-modal translation**
[11158-7]
11158 08 **Visual place recognition based on multilevel descriptors for the visually impaired people**
[11158-8]

CREATING DATABASES

- 11158 09 **Exploitable synthetic sensor imagery from high-fidelity, physics-based target and background modeling (Invited Paper)** [11158-9]
11158 0A **Semi-synthetic naval scene generation for infrared-guided missile threat analysis with separate setting of apparent temperatures for each target part** [11158-10]
11158 0B **Effective 3D modeling method using indirect information of targets for SAR image prediction**
[11158-11]

THERMAL BEHAVIOUR

- 11158 0C **Accurate estimation of temperature distributions for IR signature monitoring with a dynamic thermal model and data assimilation** [11158-12]
11158 0D **Infrared signature simulations of a mobile camouflage for a heavy military vehicle** [11158-14]

11158 OE **Analysis of target inversion temperature based on infrared dual band** [11158-15]

11158 OF **Target infrared characteristic measurement in vacuum chamber** [11158-16]

SURFACE MEASUREMENTS AND MODELLING

11158 OG **Evaluation of several vegetation indices to detect deep man-made bunkers using field spectroscopy** [11158-17]

11158 OH **Fusion of spectral and directional reflectance information** [11158-18]

11158 OI **Round robin comparison of BRDF measurements** [11158-19]

11158 OJ **The influence of the water on scene IR signature** [11158-20]

11158 OK **Modelling sea clutter infrared synthetic images** [11158-21]

OBSERVER PERFORMANCE

11158 OL **Determination of the detection threshold of human observers in acoustic drone detection (Invited Paper)** [11158-22]

11158 OM **Comparison of land vehicle target detection performance in field observation, photo simulation and video simulation** [11158-23]

11158 ON **Evaluation of target acquisition performance in photosimulation test** [11158-24]

POSTER SESSION

11158 OP **Research on design distance of visible light camouflage on water target** [11158-25]

11158 OQ **A new histogram PMHT incorporating pixel noise distribution for dim target tracking** [11158-26]
