Volume 11181

Proceedings of SPIE 0277-786X, V. 11181

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Lasers and Applications X*, edited by Ruxin Li, Upendra N. Singh, Shibin Jiang, Proceedings of SPIE Vol. 11181 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Symposium Committees</i>
xi	<i>Conference Committee</i>

LASER MATERIALS AND PROPERTIES

11181 01	Pump-induced scattering in high-power Ti: Sapphire lasers [11181-7]
----------	--

HIGH PEAK POWER LASERS

11181 06	Research on the cross polarization wave generation based on gadolinium gallium garnet crystal [11181-4]
----------	--

LASER MATERIALS AND PROPERTIES

11181 0A	Applicability of the discrete-dipole approximation to high-power laser scattering simulations of haze particles [11181-9]
----------	--

FIBER LASERS

11181 0C	2.9-μm passively Q-switched fiber laser using Au-nanocages as saturable absorber [11181-11]
11181 0D	Power scaling analysis of single mode fiber amplifiers employing novel cladding-annular-doped ultra-low NA fiber [11181-12]
11181 0F	2kW, 22GHz narrow linewidth polarization maintaining fiber amplifier with near-diffraction-limited beam quality [11181-14]

FIBER NONLINEARITY AND SOURCES

11181 0K	Pulsed generation of multimode diode-pumped graded-index fiber Raman laser [11181-19]
11181 0L	Investigation of shortwave edge in high-power supercontinuum with different peak power [11181-20]

POSTER SESSION

- 11181 OM **All-optical arbitrary temporal shaping technology of broadband low-coherence light based on saturable absorption effect** [11181-21]
- 11181 OP **Numerical modeling of passively-Q quasi-three level Ho³⁺-doped fluorotellurite fiber lasers** [11181-24]
- 11181 OR **Optimization of the pulse detection structure of the active ranging optical system** [11181-26]
- 11181 OU **Effective mitigation of mode instability by deuterium loading in Yb-doped fiber oscillator** [11181-29]
- 11181 OV **Analysis of beam direction detection errors in solid-state slab laser beam clean-up systems** [11181-30]
- 11181 OW **Suppression effect of the spectral dispersion of sinusoidal phase modulated light on formation of hot images** [11181-31]
- 11181 10 **Development of fiber-based yellow laser for dermatological applications** [11181-35]
- 11181 11 **Selection of LP01 and LP11 modes in multimode graded-index fiber Raman laser by special FBGs** [11181-36]
