PROCEEDINGS OF SPIE

AOPC 2019: Display Technology and Optical Storage

Byoungho Lee
Yongtian Wang
Xiaodi Tan
Editors

7–9 July 2019
Beijing, China

Sponsored by
Chinese Society for Optical Engineering (China)

Cosponsored by
SPIE

Organized by
Chinese Society for Optical Engineering (China)
Photoelectronic Technology Committee, Chinese Society of Astronautics (China)
Science and Technology on Low-light-level Night Vision Laboratory (China)
Science and Technology on Electro-Optical Information Security Control Laboratory (China)
Academy of Opto-Electronics of Electronics Technology of China (China)
Infrared and Laser Engineering (China)

Volume 11335

Proceedings of SPIE 0277-786X, V. 11335

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *AOPC 2019: Display Technology and Optical Storage*, edited by Byoungho Lee, Yongtian Wang, Xiaodi Tan, Proceedings of SPIE Vol. 11335 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

ix *Introduction*

DISPLAY TECHNOLOGY AND OPTICAL STORAGE

11335 02 **Holographic display based on partially coherent light** [11335-1]

11335 03 **CGH based on partially coherent light** [11335-2]

11335 04 **Resolution analysis of focused plenoptic camera with four types focal lengths** [11335-4]

11335 05 **Real-time double-depth-image-based rendering for autostereoscopic display systems** [11335-5]

11335 06 **Small water surface target visual stealth effect evaluation method** [11335-6]

11335 07 **Slightly off-axis flipping digital holography using polarization technology** [11335-7]

11335 08 **Aggregation-induced emission of tetraphenylethene photoresist film and their application in optical data storage** [11335-8]

11335 09 **A fault injection system for space imaging application** [11335-9]

11335 0A **Magnification of diffraction patterns using plane wave illumination** [11335-10]

11335 0B **High performance electrochromic device based on multifunctional hydrogel** [11335-11]

11335 0C **Multi-wavelength diffractive lens design for color imaging** [11335-15]

11335 0D **An accurate volume hologram model for optical design: simulating a multi-color holographic display using ray tracing** [11335-16]

11335 0E **Color holographic display system based on effective utilization of SLM** [11335-19]

11335 0F **Efficient DIBR method based on depth offset mapping for 3D image rendering** [11335-20]

11335 0G **Fabrication of diffractive axilens for multiplane holographic projection** [11335-21]

11335 0H **Research on active SLM device structure of deep sub-wavelength F-P resonance** [11335-24]

11335 0I **Achromatic and distortion-suppressed floating image display system using SCD** [11335-25]

11335 0J **Reconstruction of 3D structural semantic points based on multiple camera views** [11335-27]

11335 0K **Image processing for simulating the reconstructed images of holographic stereogram based on synthetic parallax images** [11335-29]

11335 0L **Effects of pickup mode and parameters of integral imaging based on C4D** [11335-30]

11335 0M **Research of combination detection and fusion method based on radar and infrared channels** [11335-31]

11335 0N **The effect of slit aperture width on the performance of integral imaging based on parallax barrier** [11335-37]

11335 0O **Calibration of fabrication error for autostereoscopic three-dimensional display** [11335-38]

11335 0P **Polymetric lenticular lens array design, ultra-precision machining and inspection technology for naked-eye 3D display** [11335-39]
