

PROCEEDINGS OF SPIE

# **AOPC 2019: Quantum Information Technology**

**Jianyu Wang  
Chaoyang Lu  
Sven Höfling**  
*Editors*

**7–9 July 2019  
Beijing, China**

*Sponsored by*  
Chinese Society for Optical Engineering (China)

*Cosponsored by*  
SPIE

*Organized by*  
Chinese Society for Optical Engineering (China)  
Photoelectronic Technology Committee, Chinese Society of Astronautics (China)  
Science and Technology on Low-light-level Night Vision Laboratory (China)  
Science and Technology on Electro-Optical Information Security Control Laboratory (China)  
Academy of Opto-Electronics of Electronics Technology of China (China)  
Infrared and Laser Engineering (China)

*Published by*  
SPIE

**Volume 11339**

Proceedings of SPIE 0277-786X, V. 11339

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *AOPC 2019: Quantum Information Technology*, edited by Jianyu Wang, Chaoyang Lu, Sven Höfling, Proceedings of SPIE Vol. 11339 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

ISSN: 0277-786X

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## QUANTUM INFORMATION TECHNOLOGY

---

11339 02	<b>The superposition invariance of unitary operators and maximally entangled state [11339-1]</b>
11339 03	<b>Phase attack on reference pulses of continuous-variable quantum key distribution with real local oscillators [11339-2]</b>
11339 04	<b>High speed comparator for single-photon avalanche photodiode [11339-4]</b>
11339 05	<b>Quantum correlations over a large bandwidth in cascaded optical parametric system [11339-6]</b>
11339 06	<b>Effect of atmosphere turbulence on the decay of orbital angular momentum entanglement state of light using the Hermite-Gaussian (HG) vortex beam encoding [11339-7]</b>
11339 07	<b>Challenges and solutions of next-generation imager: CMOS single photon avalanche diode image sensor [11339-8]</b>
11339 08	<b>Quantum color image encryption technology based on hyper-chaotic systems [11339-9]</b>
11339 09	<b>Performance analysis of free space quantum key distribution with different wavelengths [11339-10]</b>
11339 0A	<b>Quantum entanglement degrees of a two-level atom in the photonic crystals heat reservoir [11339-11]</b>
11339 0B	<b>Navigation applications of quantum microwave entanglement accomplished by electro-opto-mechanical converters [11339-12]</b>
11339 0C	<b>Research on key problems of quantum state transformation based on cavity electro-opto-mechanical system [11339-13]</b>
11339 0D	<b>Nonadiabatic robust pulses for creating superposition states in a resonant three-level system [11339-14]</b>

- 11339 0E **Experimental observation of topologically protected bound states in two dimensional quantum walk** [11339-15]
- 11339 0F **Room-temperature high-speed InGaAs/InP single-photon detector with high detection efficiency** [11339-16]
- 11339 0G **High sensitivity ranging photon-counting chirped amplitude modulation lidar** [11339-17]
- 11339 0H **Study of in situ laser modification of InAs/GaAs quantum dots** [11339-18]
- 11339 0I **Quantum navigation ranging scheme based on dual-path entangled microwaves** [11339-19]
- 11339 0J **Spectral photon irradiance and spectral photon radiance standards for the calibration of photon-counting imagers** [11339-20]
- 11339 0K **The time domain waveform of dual-path entangled microwave signals** [11339-21]
