Proceedings of SPIE, 1605-7422, V. 11219

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Visualizing and Quantifying Drug Distribution in Tissue IV*, edited by Kin Foong Chan, Conor L. Evans, Proceedings of SPIE Vol. 11219 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

---

## PHARMACOKINETIC AND PHARMACODYNAMIC TOMOGRAPHY IN PRECLINICAL RESEARCH

---

- 11219 07 **Kernel principle component analysis applied to Raman spectra to differentiate drugs administered to rabbit cornea in blind study** [11219-6]
- 11219 09 **Estimating drug delivery using hybrid system for simultaneous dynamic MRI and fluorescence tomography** [11219-8]

---

## NOVEL MODEL AND IMAGING SCREENING TOOLS FOR DRUG DEVELOPMENT

---

- 11219 0C **Quantification of anti-HER2 drug internalization in human breast cancer cells using fluorescence lifetime FRET imaging** [11219-11]
- 11219 0D **Alkyne-tag SERS imaging for visualizing small molecule drugs in live cells** [11219-12]
- 11219 0F **Intracellular paired agent imaging enables improved evaluation of tyrosine kinase inhibitor target engagement** [11219-14]
- 11219 0G **A paired-agent fluorescent molecular imaging strategy for quantifying antibody drug target engagement in in vivo window chamber xenograft models** [11219-15]

---

## ADVANCED METHODS IN DRUG DETECTION AND IMAGING

---

- 11219 0K **Noninvasive in vivo mapping of intracellular signaling proteins using a pairing of targeted and untargeted fluorescently labeled small molecule kinase inhibitors** [11219-19]
- 11219 0L **Dye diffusion proximal to in situ forming implants is increased by ultrasound stimulation** [11219-20]
- 11219 0M **Developing a novel hyperspectral imaging cryomacrotome for whole body fluorescence imaging** [11219-21]

**POSTER SESSION**

---

- 11219 0O **Fluorescent imaging technologies for in situ measurement of drug target engagement and cell signaling pathways** [11219-23]
- 11219 0P **Effect of nonspecific binding of imaging agents to plasma protein in the paired-agent imaging for resection during surgery (PAIRS)** [11219-24]
