**Volume 11222**

Proceedings of SPIE, 1605-7422, V. 11222

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Molecular-Guided Surgery: Molecules, Devices, and Applications VI*, edited by Sylvain Gioux, Summer L. Gibbs, Brian W. Pogue, Proceedings of SPIE Vol. 11222 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Authors*  
vii *Conference Committee*

---

## ADVANCED DETECTION METHODS I

---

11222 05 **Rapid assessment of skin surgical margins using superpixel Raman spectroscopic imaging**  
[11222-5]

---

## ADVANCED DETECTION METHODS II

---

11222 08 **Affinity-based color enhancement methods for contrast enhancement in hyperspectral and multimodal imaging** [11222-7]

---

## IMAGING SYSTEMS

---

11222 0F **Endosteal and periosteal blood flow quantified with dynamic contrast-enhanced fluorescence to guide open orthopaedic surgery** [11222-14]

---

## CONTRAST AGENTS

---

11222 0I **In vivo nerve-specificity of rhodamines and Si-rhodamines** [11222-17]

11222 0J **Fluorescence image-guided surgery: a perspective on contrast agent development** [11222-18]

11222 0K **Fluorescence imaging contrast in guided surgery on nerves measured in rats in vivo** [11222-19]

---

## CLINICAL TRANSLATION AND CLINICAL APPLICATIONS I

---

11222 0M **MUC16 as a potential target for the surgical detection of pancreatic cancer (Invited Paper)**  
[11222-21]

11222 0O **Task-based evaluation of fluorescent-guided cancer surgery as a means of identifying optimal imaging agent properties in the context of variability in tumor- and healthy-tissue physiology**  
[11222-23]

11222 0P **A proof-of-concept methodology to validate the in situ visualization of residual disease using cancer-targeted molecular agents in fluorescence-guided surgery** [11222-24]

---

## CLINICAL TRANSLATION AND CLINICAL APPLICATIONS II

---

- 11222 0Q **The clinical translation of a near-infrared fluorophore for fluorescence guided surgery: SGM-101 from the lab to a phase III trial (Invited Paper)** [11222-30]
- 11222 0T **Considerations for NIR-I and short-wave infrared (SWIR) fluorescence imaging within a clinical operating room** [11222-28]

---

## CLINICAL TRANSLATION AND CLINICAL APPLICATIONS III

---

- 11222 0X **Perspectives on the phase 0 clinical trial of microdose administration of ABY-029 for fluorescence guided surgery: stability testing** [11222-32]
- 11222 0Y **Effect of preoperative cancer treatment on epidermal growth factor receptor (EGFR) receptor expression level in ABY-029 guided sarcoma surgery** [11222-33]
