Volume 11232

Proceedings of SPIE, 1605-7422, V. 11232

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Multimodal Biomedical Imaging XV*, edited by Fred S. Azar, Xavier Intes, Qianqian Fang, Proceedings of SPIE Vol. 11232 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

OCT

11232 02	Endoscopic optical coherence tomography (OCT) and autofluorescence imaging (AFI) of ex vivo fallopian tubes [11232-1]
11232 03	Near-infrared fluorophore capped gold nanostars for enhanced detection of choroidal neovascularization in living rabbits using multimodal photoacoustic microscopy, optical coherence tomography, and fluorescence microscopy [11232-2]

TISSUE IMAGING AND SPECTROSCOPY

11232 0I	A snapshot multi-wavelengths imaging device for in-vivo skin diagnostics [11232-19]
----------	--

POSTER SESSION

11232 0K	Classification of brain lesions from MRI images using a novel neural network [11232-17]
11232 0L	Quantitative comparison of Gegenbauer, filtered Fourier, and Fourier reconstruction for MRI [11232-21]
11232 0M	Observations of the bowel wall in the case of acute ischemia: optical coherence tomography, FLIM macro-imaging and histological analysis data [11232-22]
11232 0N	Towards combined multispectral, FLIM and Raman imaging for skin diagnostics [11232-23]
