Volume 11243

Proceedings of SPIE, 1605-7422, V. 11243

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Imaging, Manipulation, and Analysis of Biomolecules, Cells, and Tissues XVIII*, edited by Daniel L. Farkas, Attila Tarnok, Proceedings of SPIE Vol. 11243 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	Authors
vii	Conference Committee

FUNCTIONAL IMAGING II

11243 0I	Estimation of melanin concentration, blood concentration, and oxygen saturation in skin tissue layers with different depths unaffected by shading [11243-18]
11243 0K	Dual-color on-chip light sheet microscopy of drosophila embryos [11243-20]

BIOMEDICAL IMAGING USING A DMD OR OTHER MEMS ARRAY: JOINT SESSION WITH 11243 AND 11294

11243 0L	Spectral illumination system utilizing spherical reflection optics [11243-22]
----------	---

CYTOMICS II

11243 0Q	Optimizing white blood cell contrast in graded-field capillaroscopy using capillary tissue phantoms [11243-27]
11243 0S	Flow cytometry visualization and real-time processing with a CMOS SPAD array and high-speed hardware implementation algorithm [11243-29]
11243 0T	Instance segmentation of immune cells in human lupus nephritis using deep learning: comparing performance on sample preparation and staining panels [11243-30]

CYTOMICS III

11243 0Y	Comparison of spectral FRET microscopy approaches for single-cell analysis [11243-35]
----------	---

SPECTRAL IMAGING I

11243 11	Towards an ultrathin multi-aperture microscope [11243-39]
----------	---

SPECTRAL IMAGING II

11243 17 Deep UV microscopy of prostate cancer tissue [11243-45]

MONITORING AND REGENERATIVE MEDICINE I

11243 1D Probing metabolic alteration of differentiating induced pluripotent stem cells using label-free FLIM [11243-51]

FUNCTIONAL IMAGING III

11243 1P Lymph node micrometastases detection using paired-agent imaging protocol with biological tissue model [11243-12]

11243 1R Structural remodeling of fibrillar collagens in posterior tibial tendinopathy in three dimensional space identified using multiphoton and second harmonic generation imaging [11243-14]

POSTER SESSION

11243 1T Indirect and direct pharmacokinetic parameter reconstruction in dynamic diffuse fluorescence tomography by adaptive extended Kalman filtering scheme [11243-60]

11243 1W Enhancement of Xe-NMR signals at low magnetic field using optical pumping hyperpolarization [11243-63]

11243 1Z The development of a mechano-biological assessment of leukemia cells using optical tweezers [11243-66]
